(57) **CLAIM**

The ornamental design for a fluid container with pressure seal, as shown and described.

DESCRIPTION

FIG. 1 is an upper perspective view of a fluid container with pressure seal according to a first embodiment of the design; FIG. 2 is a lower perspective view of the fluid container with pressure seal shown in FIG. 1; FIG. 3 is a front view thereof; FIG. 4 is a left side view thereof; FIG. 5 is a top view thereof; FIG. 6 is a bottom view thereof. FIG. 7 is an upper perspective view of a fluid container with pressure seal according to a second embodiment of the design; FIG. 8 is a lower perspective view of the fluid container with pressure seal shown in FIG. 7; FIG. 9 is a front view thereof; FIG. 10 is a left side view thereof; FIG. 11 is a top view thereof; and, FIG. 12 is a bottom view thereof. The back views of the first embodiment and the second embodiment are substantially mirror images of the front views shown in FIG. 3 and FIG. 9, respectively. The right side views of the first embodiment and the second embodiment are substantially mirror images of the left side views shown in FIG. 4 and FIG. 10, respectively. The broken lines on the side of the top cap shown in FIGS. 1-12 illustrate screws on the side of the cap. The broken lines on the bottom cap shown in FIGS. 2, 6, 8, and 12 illustrate holes in the bottom cap. The additional broken lines on the top cap shown in FIGS. 7-11 illustrate an optional fluted shape for the top of the fill port plug in the top cap. The broken lines shown in the figures are for the purpose of illustrating portions of the fluid container with pressure seal and form no part of the claimed design.
