(57) **CLAIM**

The ornamental design for a computing device with graphical user interface for communicating health-related messages regarding ventilated patients, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a computing device with graphical user interface for communicating health-related messages regarding ventilated patients; and, FIG. 2 is a front view of a second embodiment thereof. The broken line showing of icons, text, and horizontal and vertical rules, within the boundaries of the illustrated graphical user interface, are directed to environment of the interface and form no part of the claimed design. The outer-most broken line is directed to environmental structure of the computing device, which is excluded from the claim.
