(57) **CLAIM**

The ornamental design for a display system or portion thereof with a virtual three-dimensional animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display system or portion thereof with a virtual three-dimensional animated graphical user interface showing a first image of the claimed design; FIG. 2 is a second image thereof; FIG. 3 is a third image thereof; and, FIG. 4 is a fourth image thereof.

The outermost broken lines in the figures show a display system or portion thereof, and form no part of the claimed design. The other broken lines in the figures show portions of the virtual three-dimensional animated graphical user interface that form no part of the claimed design.

The shaded claimed portions in the figures show a contrast in appearance with the non-shaded claimed portions.

The appearance of the animated image sequentially transitions between the images shown in FIGS. 1-4. The process or period in which one image transitions to another forms no part of the claimed design.

The oblique line shading in the figures represents the appearance of transparency/translucency.
