(57) **CLAIM**

The ornamental design for an elevator wall surface having decorative mirror, as shown and described.

DESCRIPTION

The FIGURE is an orthographic view of an elevator wall surface having decorative mirror.

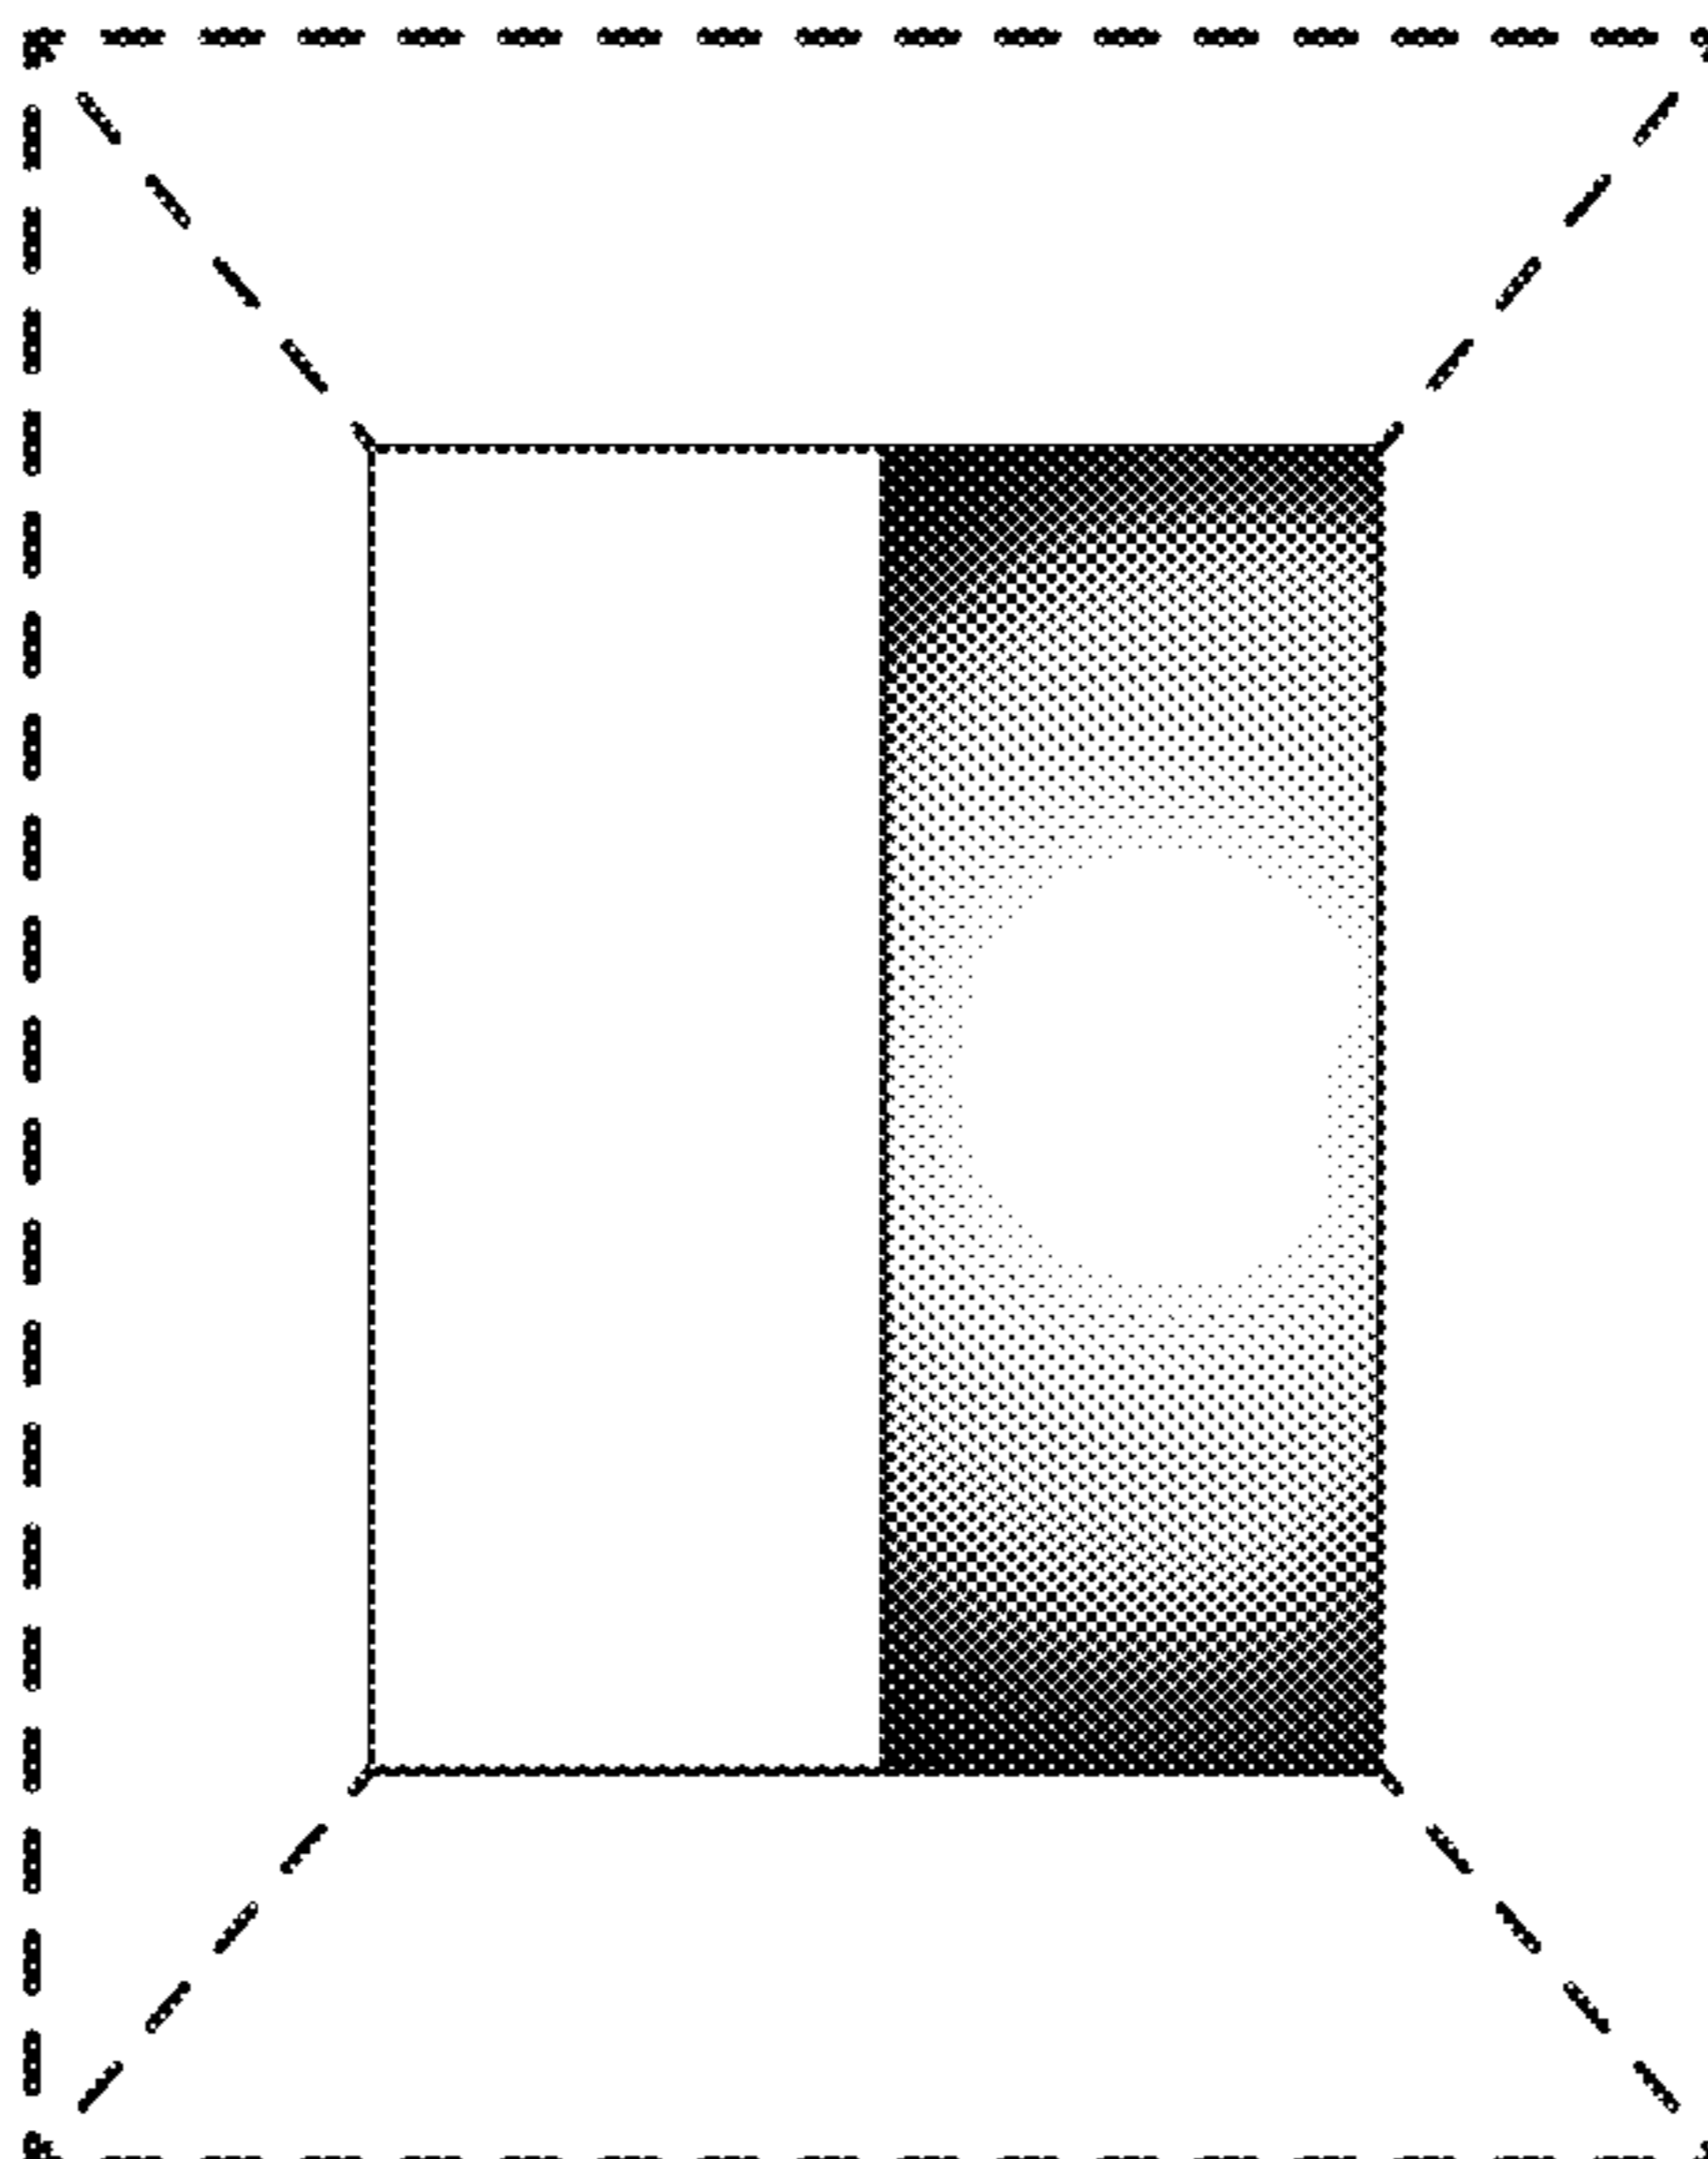

The broken-lines illustrate environmental structure and form no part of the claimed design. In particular, the broken lines showing the side, top and bottom walls of the elevator cab are flat and unornamented.

The claimed design in the FIGURE concerns a rear wall divided into two panels, one of which is a mirrored panel, with a vertical seam in between. The seam is visible in the same plane as the illustrated panels, with no depth.

Any combination of the illustrated features, including claimed features and unclaimed features, may be claimed in this application or a continuing application claiming priority to this application by converting any portion of the broken lines to solid lines, any portion of the solid lines to broken lines, or both.

Our design is not limited to the exact details shown in the drawings, since equivalents and colorable imitations thereof will be evident to a person of ordinary skill in the art. Within the scope of the appended claim, in which we intend to cover only the ornamental and novel elements shown in the drawings, our invention may be practiced otherwise than as specifically shown and described herein.
