(57) **CLAIM**

The ornamental design for a soil sensor module for a soil sensing system, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawings will be provided by the Office upon request and payment of the necessary fee

FIG. 1 is a front and bottom perspective view of a soil sensor module for a soil sensing system.

FIG. 2 is a front view thereof.

FIG. 3 is a back view thereof.

FIG. 4 is a left side view thereof.

FIG. 5 is a right side view thereof; and,

FIG. 6 is a bottom view thereof.

The broken lines shown are included for the purpose of illustrating portions of the soil sensor module for a soil sensing system that form no part of the claim.

1 Claim, 5 Drawing Sheets
