(57) **CLAIM**

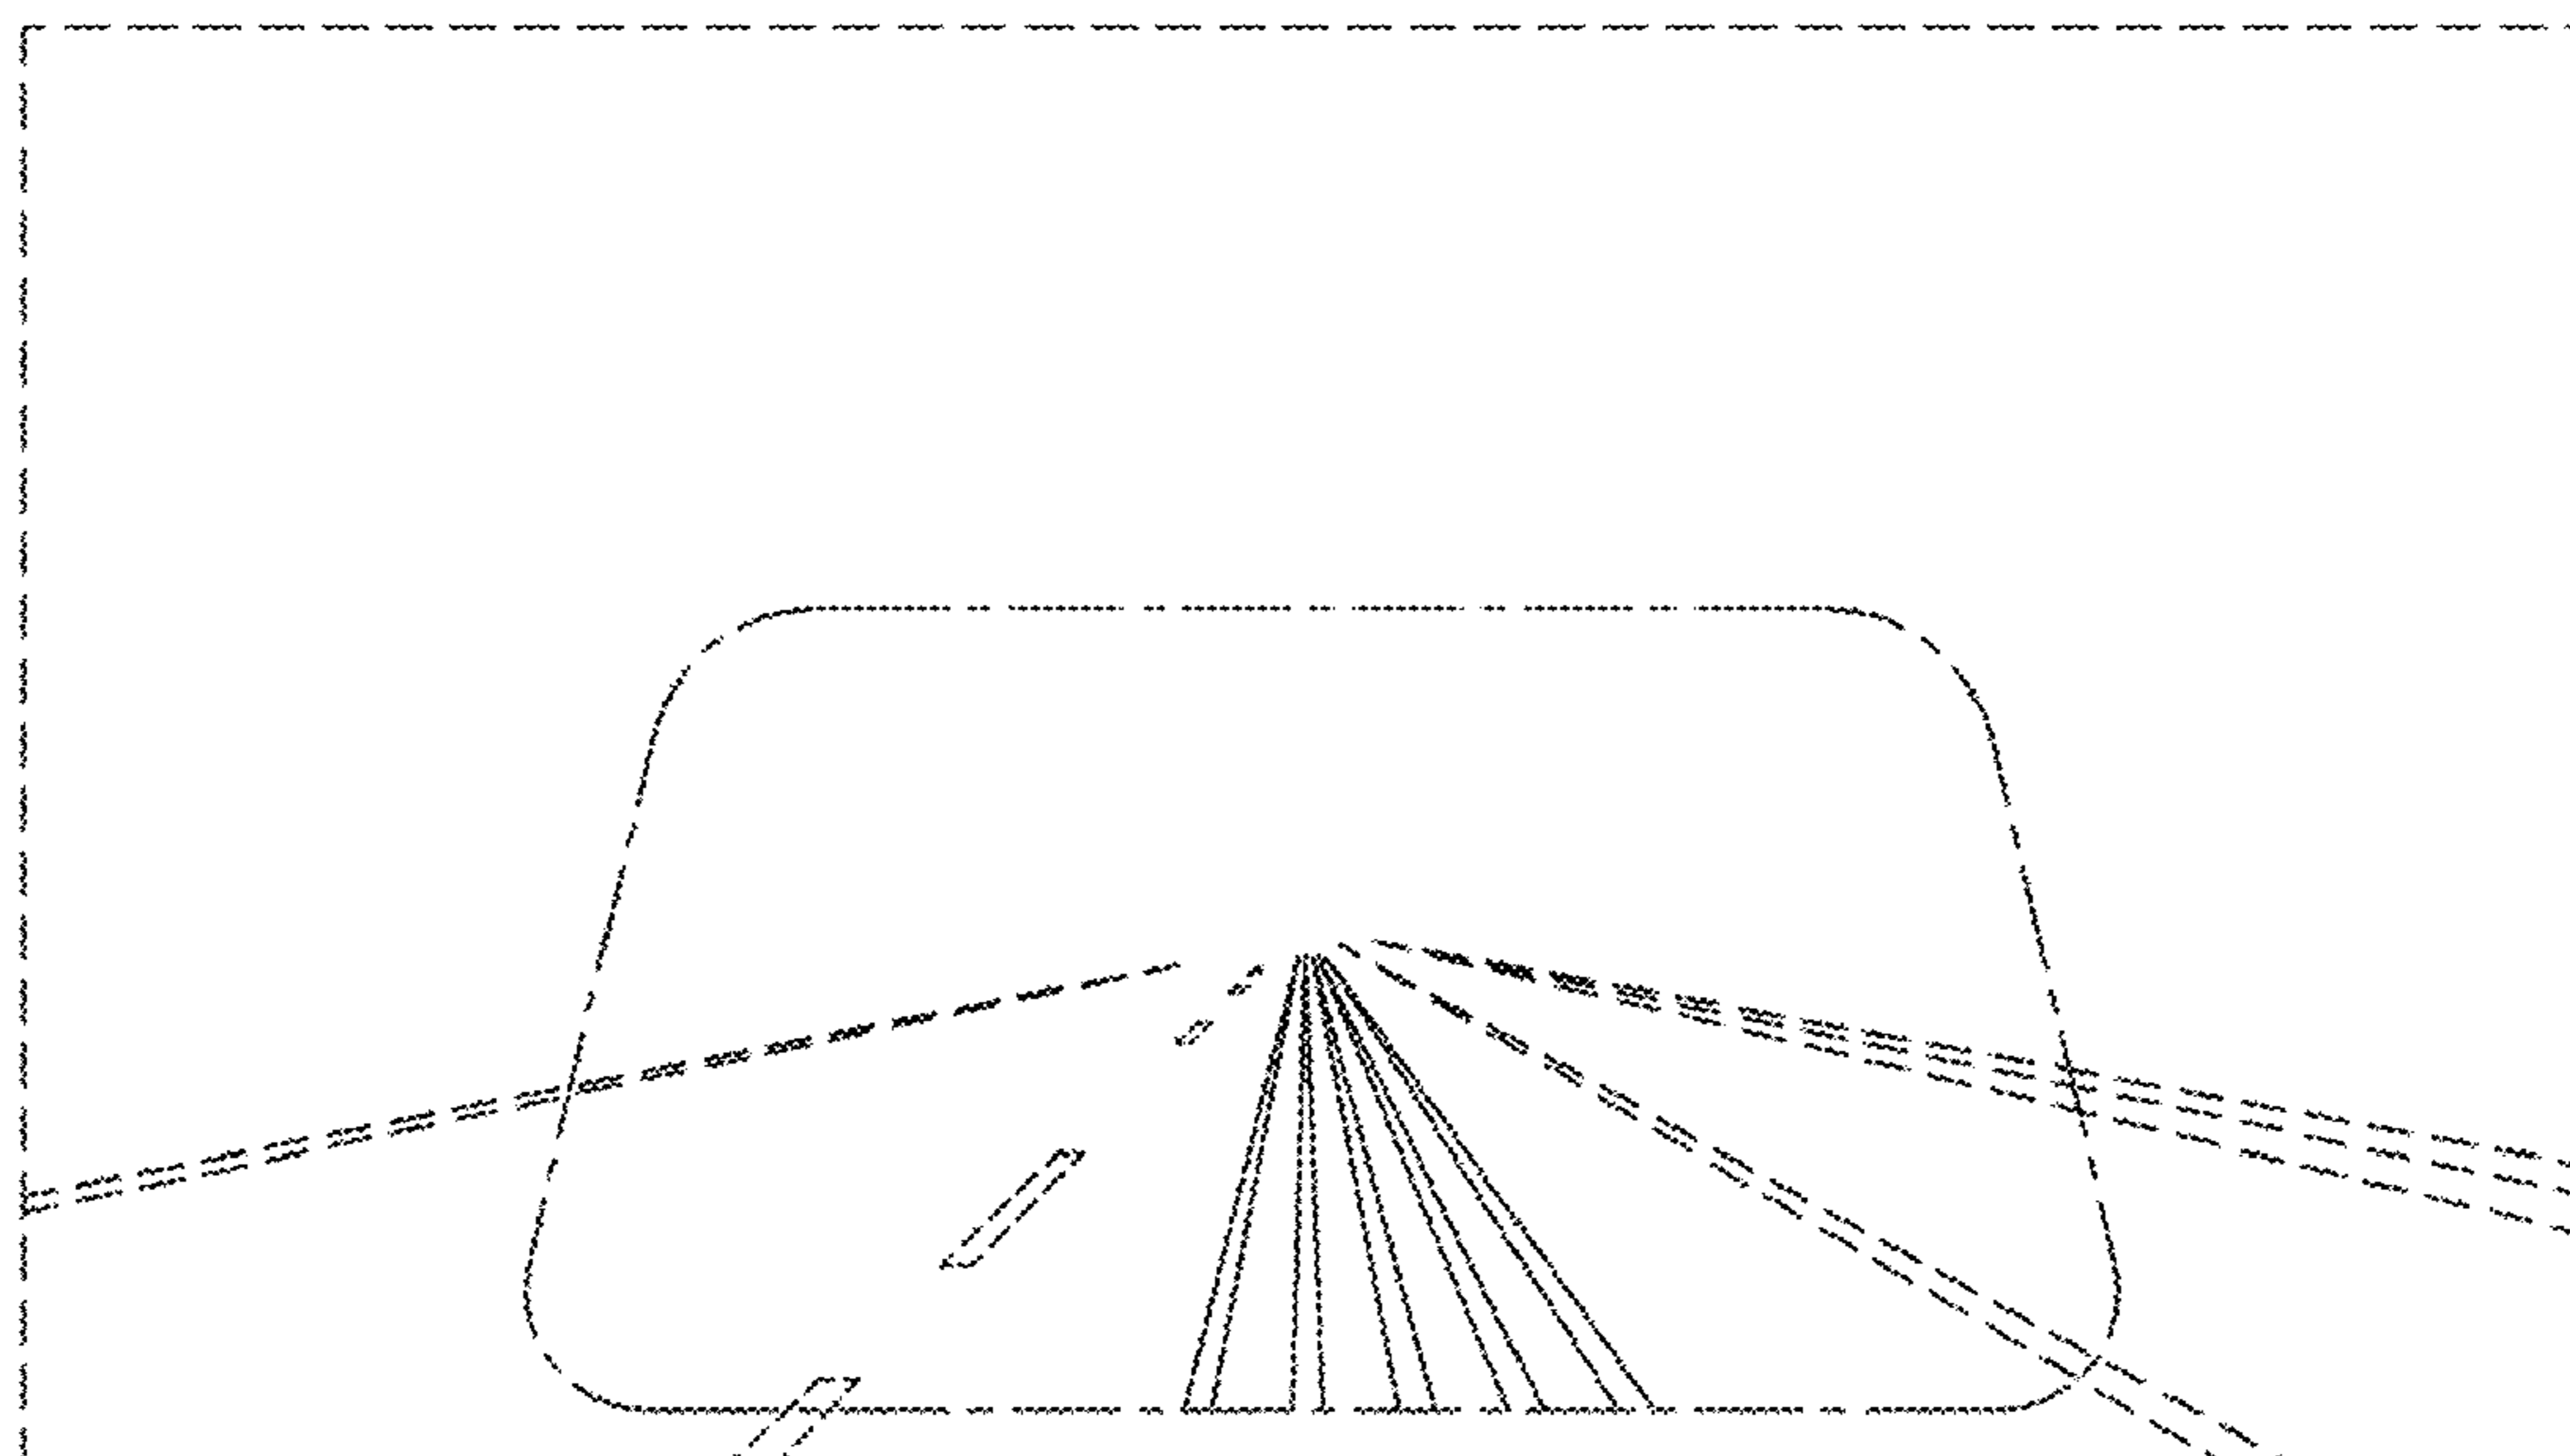

The ornamental design for a heads-up display screen for automobile glass with image, as shown and described.

DESCRIPTION

The FIGURE is a front view of a heads-up display screen for automobile glass with image, showing the new design. The image is displayed on the glass as a heads up display. The broken lines shown in the drawings illustrate portions of a glass for automobiles that form no part of the claimed design.

The broken lines of uneven length show the boundary between the portions to be registered of a design patent as a partial design is pursued and the part that does not.

1 Claim, 1 Drawing Sheet
