(57) **CLAIM**

The ornamental design for a display screen or portion thereof with a transitional graphical user interface for AI predictions of radioanatomy images, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof with a transitional graphical user interface for AI predictions of radioanatomy images.

FIG. 2 is a second image thereof.

FIG. 3 is a third image thereof.

FIG. 4 is a fourth image thereof.

FIG. 5 is a fifth image thereof.

FIG. 6 is a sixth image thereof.

FIG. 7 is a seventh image thereof.

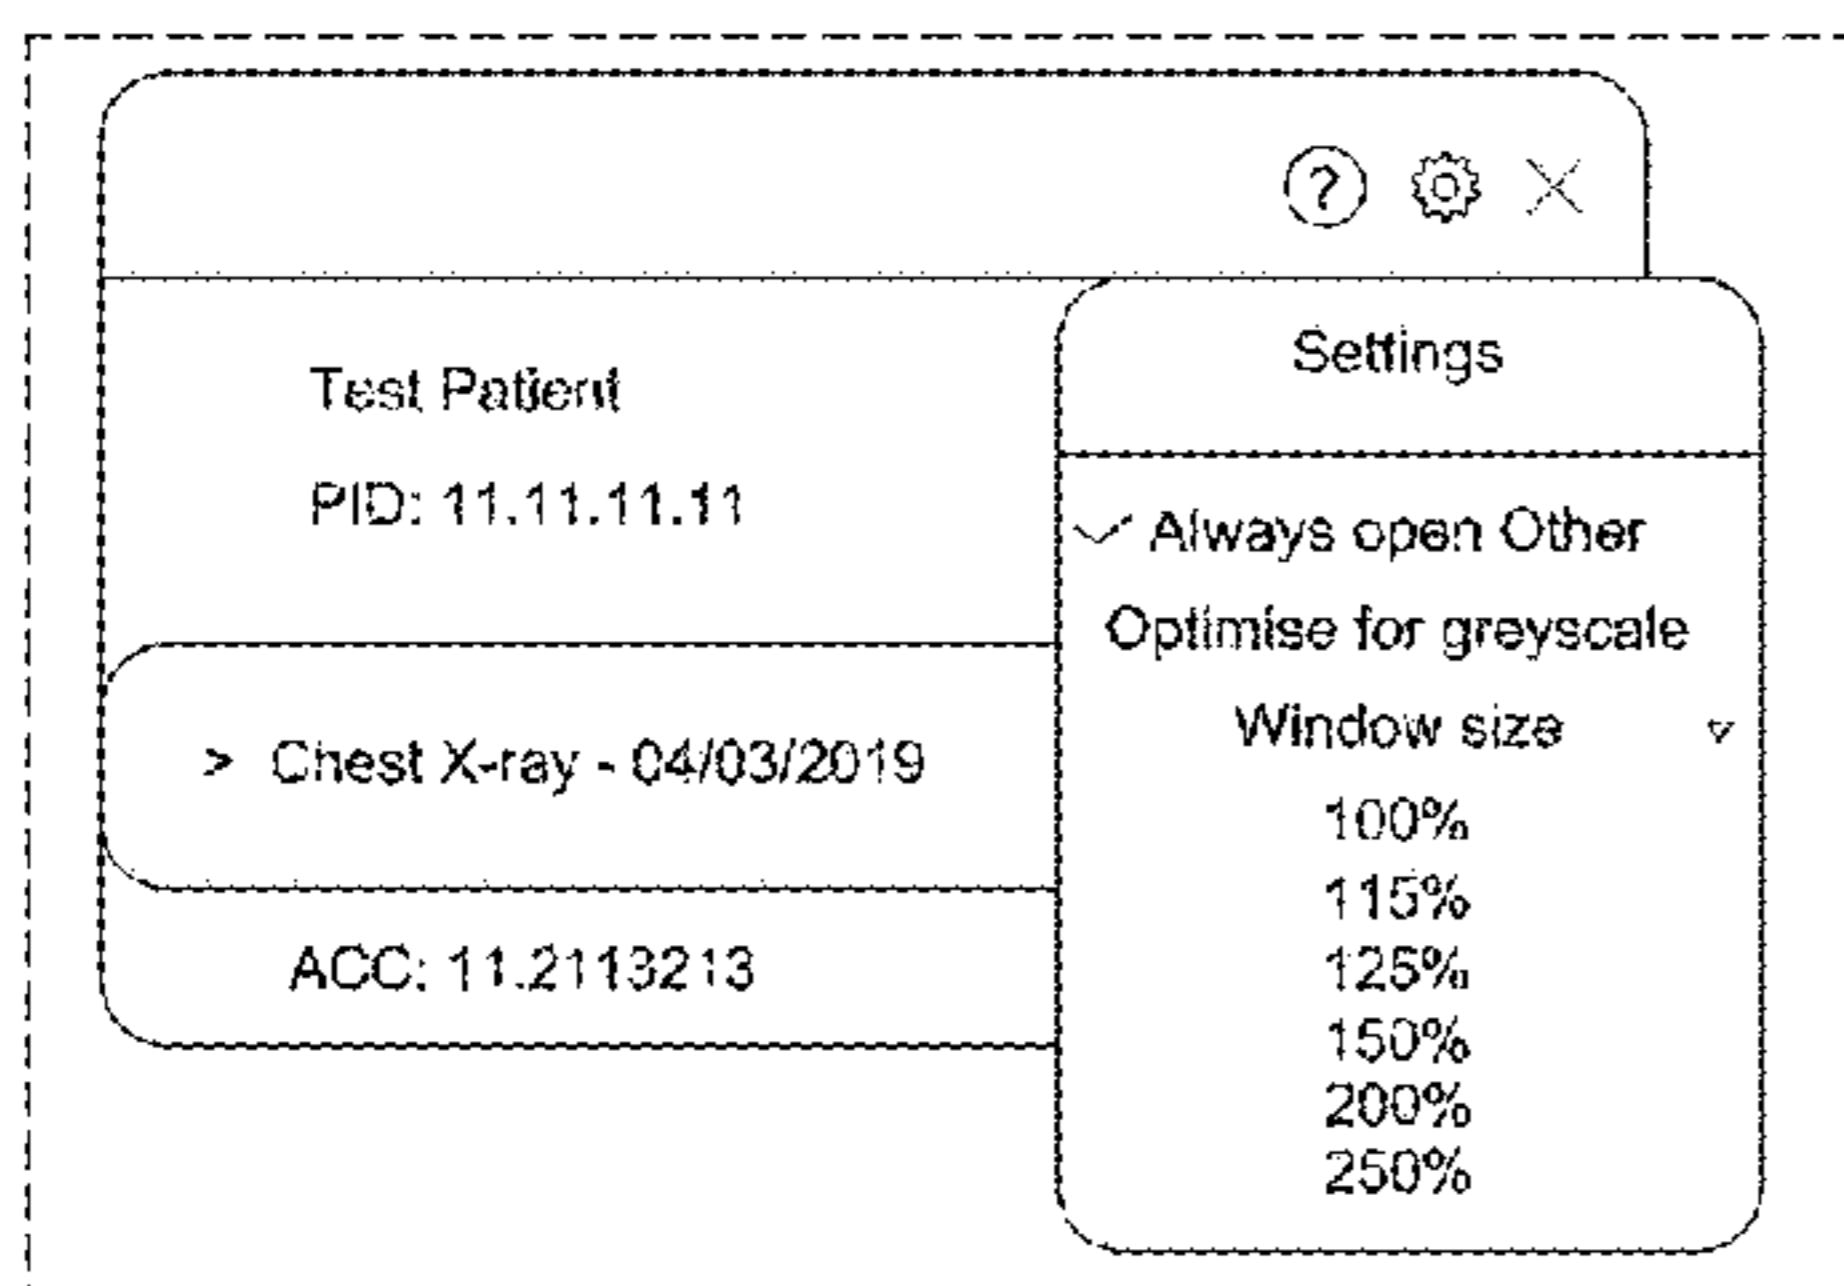

FIG. 8 is a eighth image thereof; and,

FIG. 9 is a ninth image thereof.

The process or period in which one image transitions to another image forms no part of the claimed design.

The perimeter dashed box forming a frame around the transitional graphical user interface are for the purpose of illustrating a display screen or a portion thereof that forms no part of the claimed design. The remaining broken lines illustrate portions of the transitional graphical user interface. None of the aforementioned broken lines form part of the claimed design.
