(57) **CLAIM**

The ornamental design for a tire, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire taken generally from a front and first side of the tire;
 FIG. 2 is a front view thereof;
 FIG. 3 is a first side view thereof, the second side is the same as the first side;
 FIG. 4 is an enlarged, partial perspective view taken generally from the front and the first side thereof;
 FIG. 5 is an enlarged, partial front view thereof; and,
 FIG. 6 is an enlarged, partial view of the first side thereof. The broken lines and the sidewall region between the broken lines that define the inner bead and the sidewall depict subject matter that forms no part of the claimed tire design and are included for the purpose of illustrating the full tire. Likewise, the tire interior forms no part of the claim. The tread pattern is understood to repeat throughout the circumference of the tire, and due to the symmetric nature of the design, the top and bottom views are the same as the front view based on the repeating nature of the tread design pattern throughout the circumference.

1 Claim, 6 Drawing Sheets
