(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawings will be provided by the Office upon request and payment of the necessary fee.

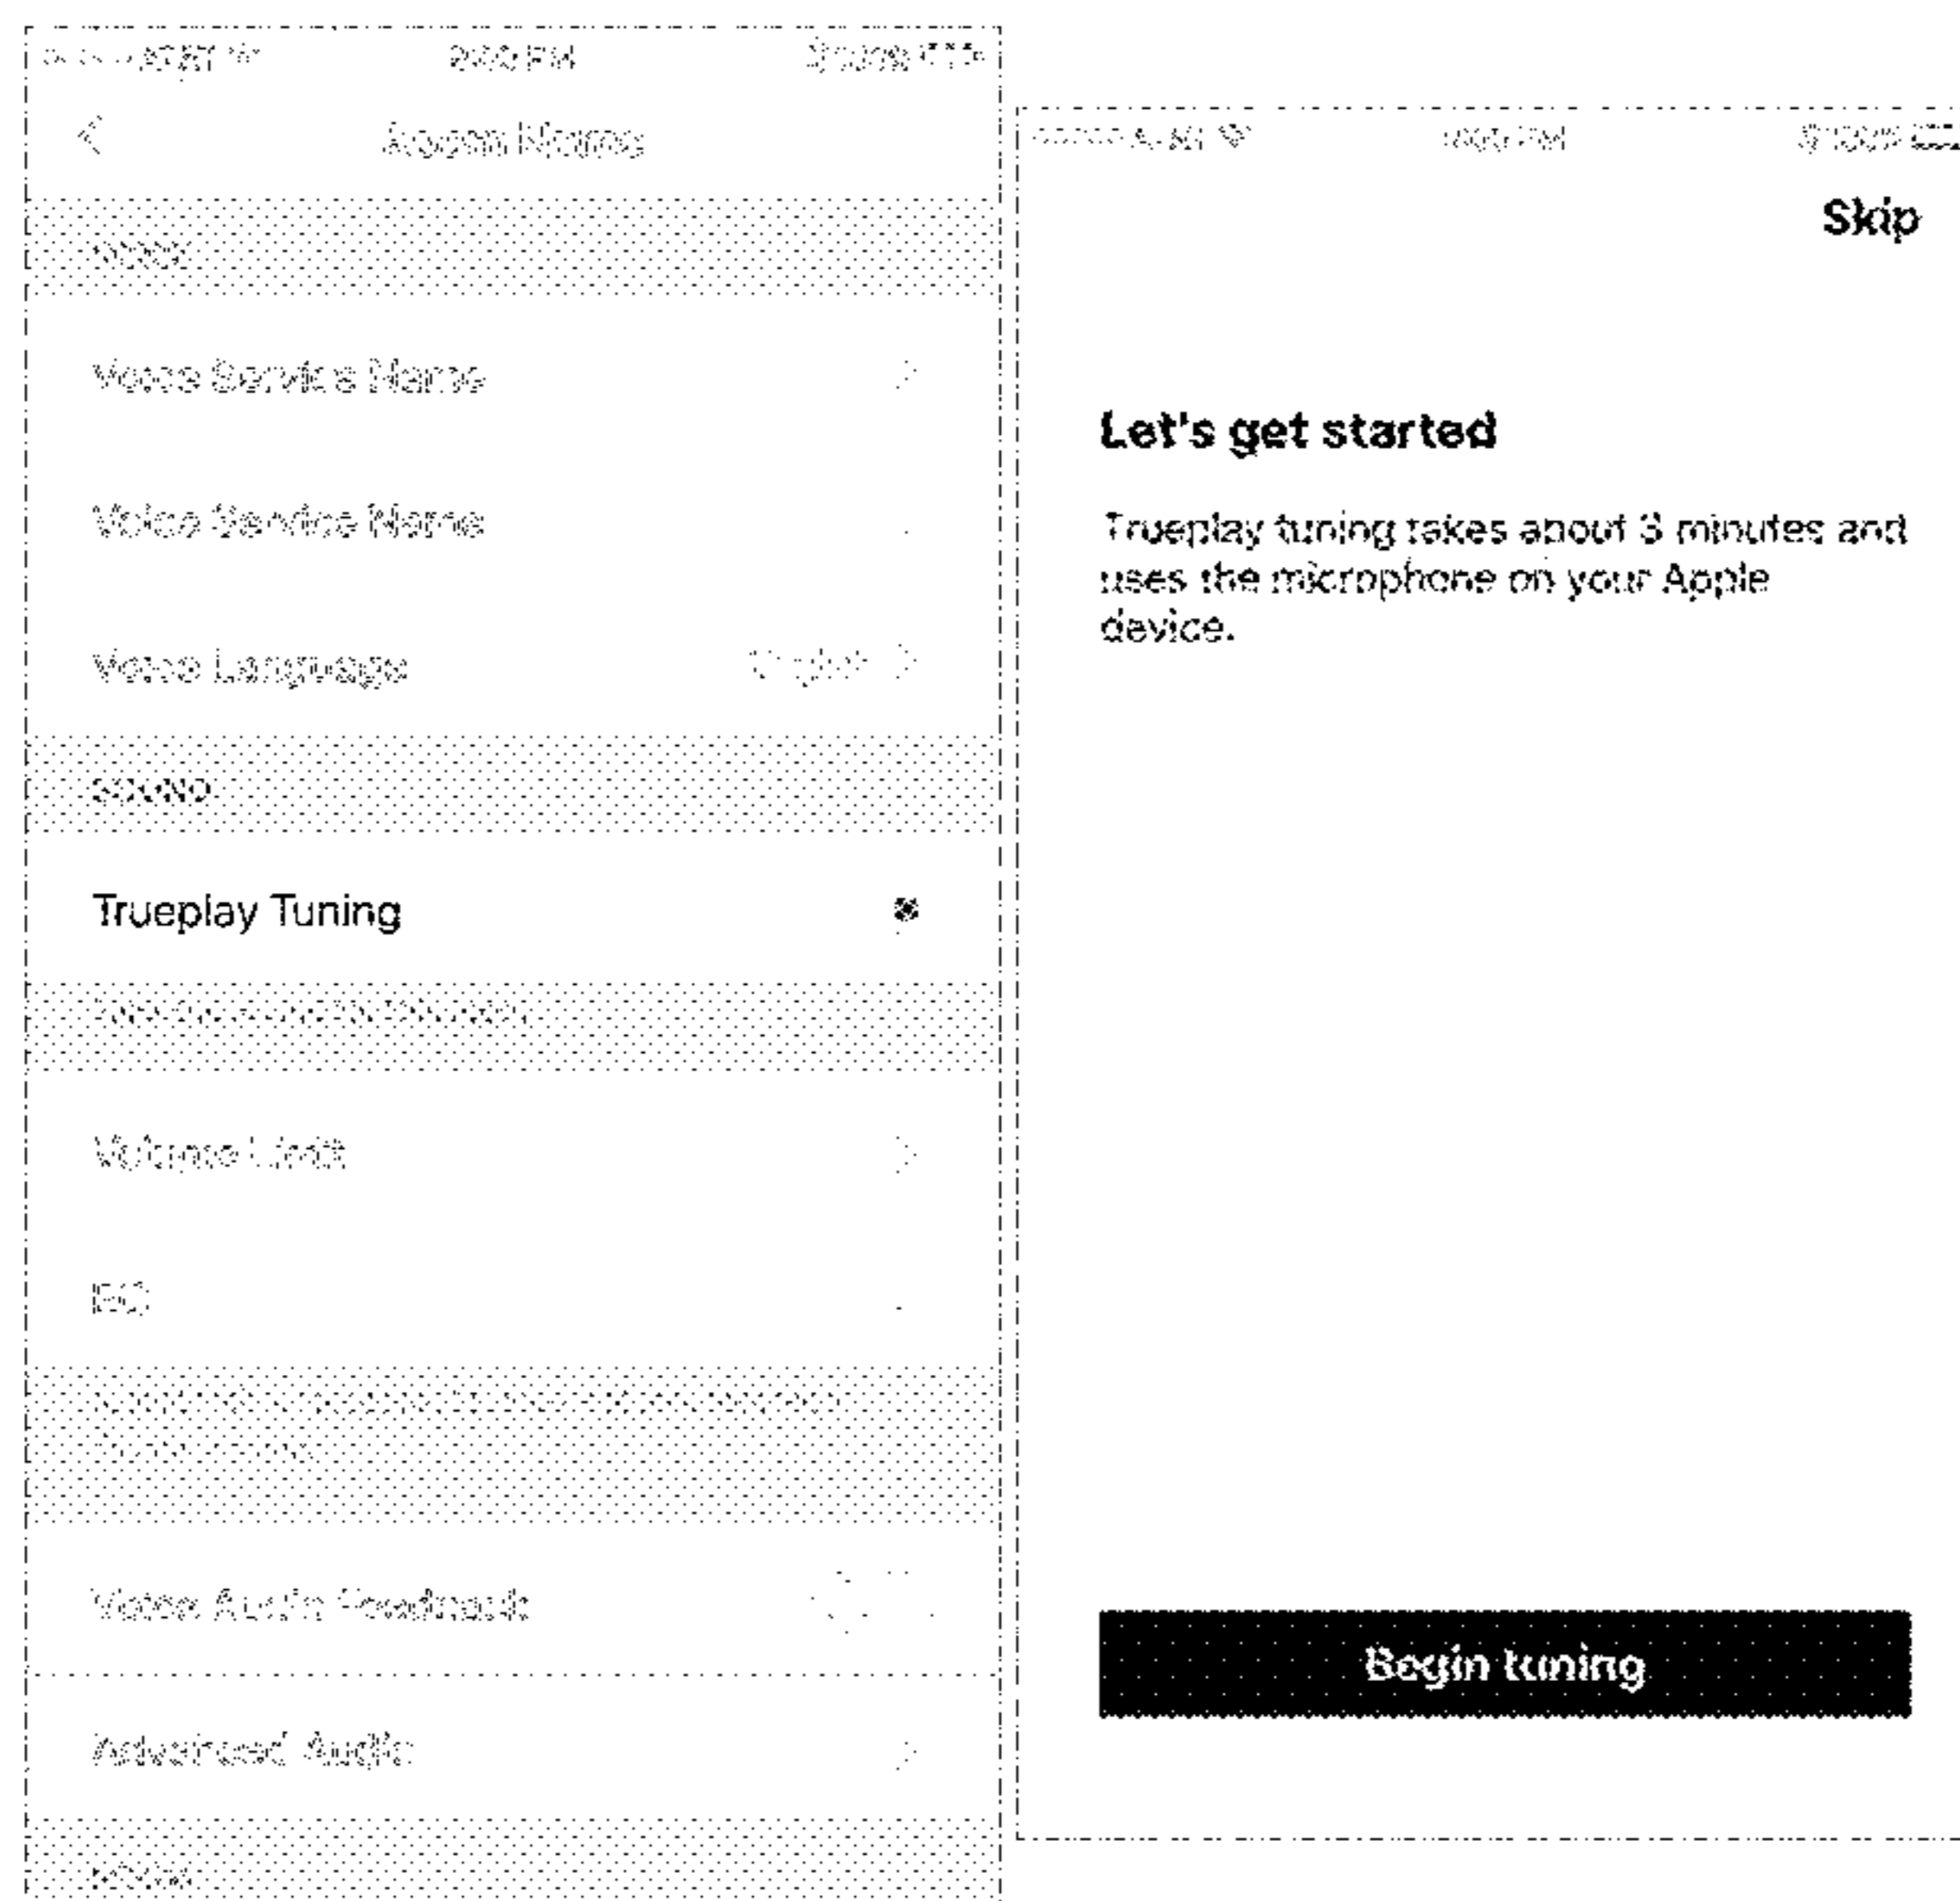

FIG. 1 is a front elevational view of a first image in a sequence of a display screen with graphical user interface; FIG. 2 is a front elevational view of a second image in the sequence; and,

FIG. 3 is a front elevational view of a third image in the sequence.

The broken line showing of the display screen and remainder of the graphical user interface forms no part of the claimed design.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period in which one image transitions to another forms no part of the claimed design. The features shown in broken lines do not form part of the claimed design.
