(57) **CLAIM**

We claim the ornamental design for a mobile phone with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of the first image in a sequence of a first embodiment of a mobile phone with transitional graphical user interface showing our new design with the transitional graphical user interface displayed on an inner display screen of the mobile phone shown in a fully open state;

FIG. 2 is a rear view thereof;

FIG. 3 is a front view of the second image in a sequence of the first embodiment of a mobile phone with transitional graphical user interface showing our new design with the transitional graphical user interface displayed on an outer display screen of the mobile phone in a folded state;

FIG. 4 is a rear view thereof;

FIG. 5 is a front view of the first image in a sequence of a second embodiment of a mobile phone with transitional graphical user interface showing our new design with the transitional graphical user interface displayed on an inner display screen of the mobile phone shown in a fully open state;

FIG. 6 is a rear view thereof;

FIG. 7 is a front view of the second image in a sequence of the second embodiment of a mobile phone with transitional graphical user interface showing our new design with the transitional graphical user interface displayed on an outer display screen of the mobile phone in a folded state; and, FIG. 8 is a rear view thereof.

The broken lines in the figures depict portions of the mobile phone with transitional graphical user interface which form no part of the claimed design.

The appearance of the transitional graphical user interface sequentially transitions between the images shown in FIGS. 1 and 3 and FIGS. 5 and 7, respectively. The process or period in which one image transitions to another forms no part of the claimed design.
