DESCRIPTION

FIG. 1 is a perspective view of a digital-analog converter; FIG. 2 is a front elevational view of the digital-analog converter; FIG. 3 is a rear elevational view of the digital-analog converter; FIG. 4 is a top plan view of the digital-analog converter; FIG. 5 is a bottom plan view of the digital-analog converter; FIG. 6 is a right side elevational view of the digital-analog converter; FIG. 7 is a left side elevational view of the digital-analog converter; and FIG. 8 is a sectional view of the digital-analog converter taken along line 8-8 of FIG. 2; FIG. 9 is another front elevational view of design of FIG. 1, showing a state of use of the digital-analog converter; and, FIG. 10 is another perspective view of design of FIG. 1, showing a state of use of the digital-analog converter. The dot-dot-dash broken lines showing of stands are attached to the digital-analog converter for the purpose of illustrating environmental structure only and form no part of the claim; while all other broken lines in the drawings depict portions of the digital-analog converter that form no part of the claimed design.
