(57) **CLAIM**

The ornamental design for a can for drinks, as shown and described.

DESCRIPTION

1. Can for drinks

1.1 : Front

1.2 : Exploded

1.3 : Front tilted view of the lower part

1.4 : Top

1.5 : Top view of lower part

The model represents a unified technical system of connecting two cylindrical parts of cans to each other as a repeatable detachable connection into a single two-part cylindrical can; The problem solved by the model is that the user, when buying a multifunctional can, at the same time buys a drink in one part of the can, and a snack or any other accessory, in one package or together, and the can can be disassembled and assembled via a repeatable mechanical connection at any time or can later also be used to store small items.
