(57) **CLAIM**

The ornamental design for a computer display screen with an animated graphical user interface, as shown and described.

DESCRIPTION

1. Computer display screen with an animated graphical user interface

1.1 : First image in a sequence

1.2 : Second image in a sequence

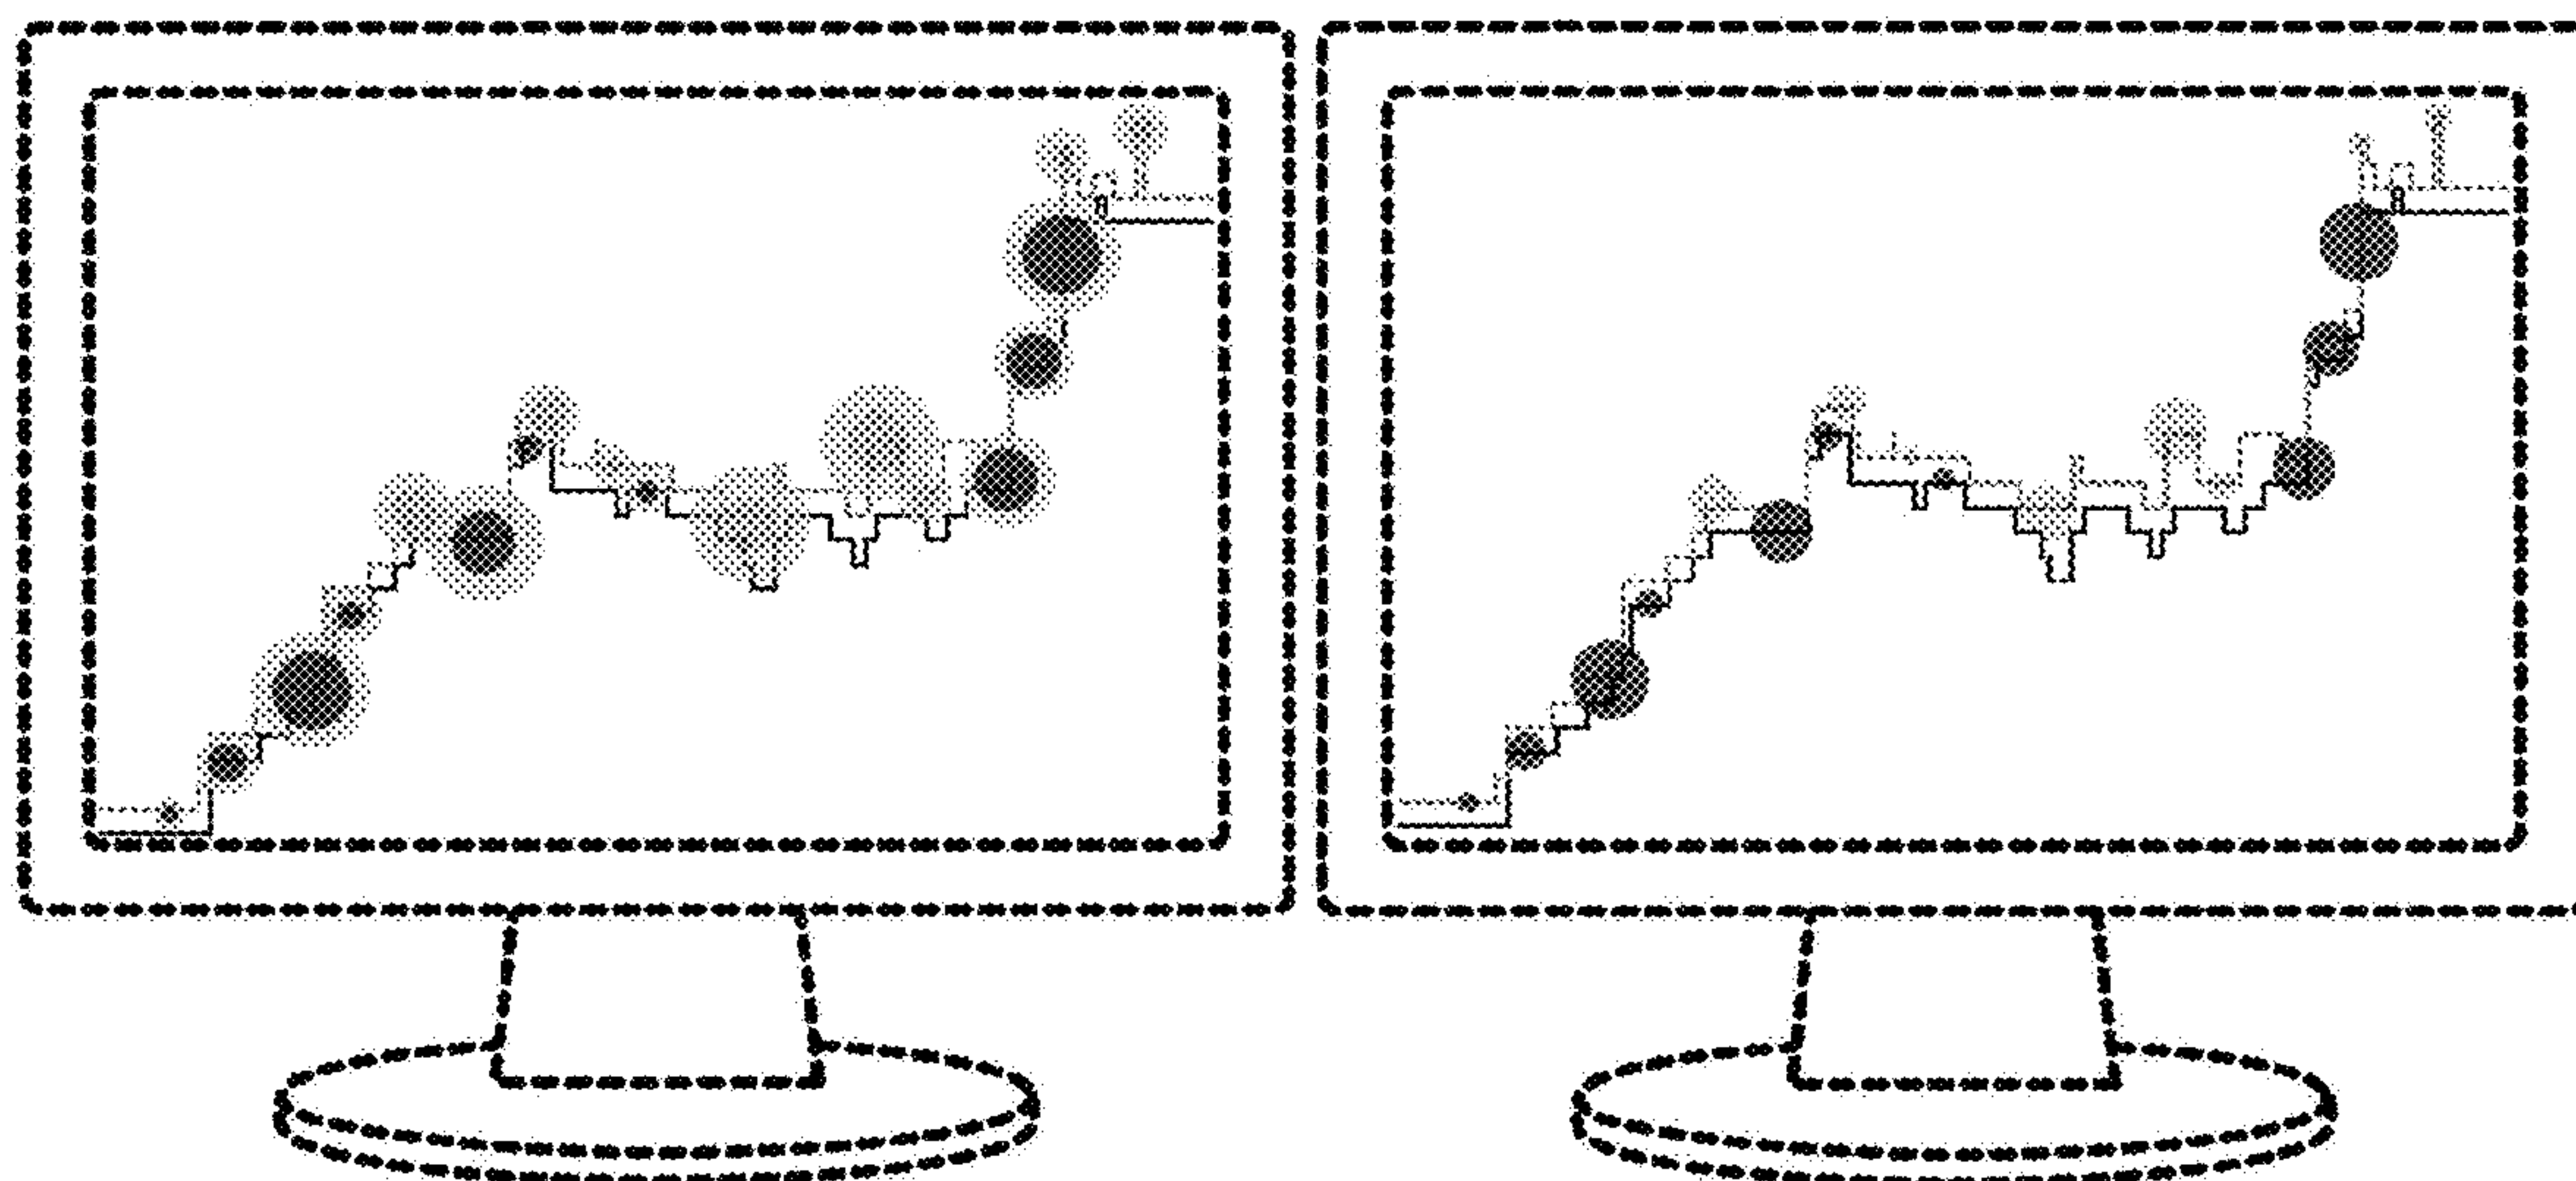

This design is for a display screen with an animated graphical user interface (AGUI) that shows the transacted volume of various financial instruments, such as futures, stocks, cryptocurrencies, or others.

The appearance of the transitional image sequentially transitions between the images shown in reproductions **1.1-1.2**.

The process or period in which one image transitions to another image forms no part of the claimed design.

The broken lines showing the computer and computer display screen form no part of the claimed design. All features of the animated graphical user interface shown within the broken line border of the display screen form part of the claimed design as shown.
