(57) **CLAIM**

The ornamental design for a display screen with graphical user interface for a software directed at constructing machine learning workflows through machine learning suggestions, as shown and described.

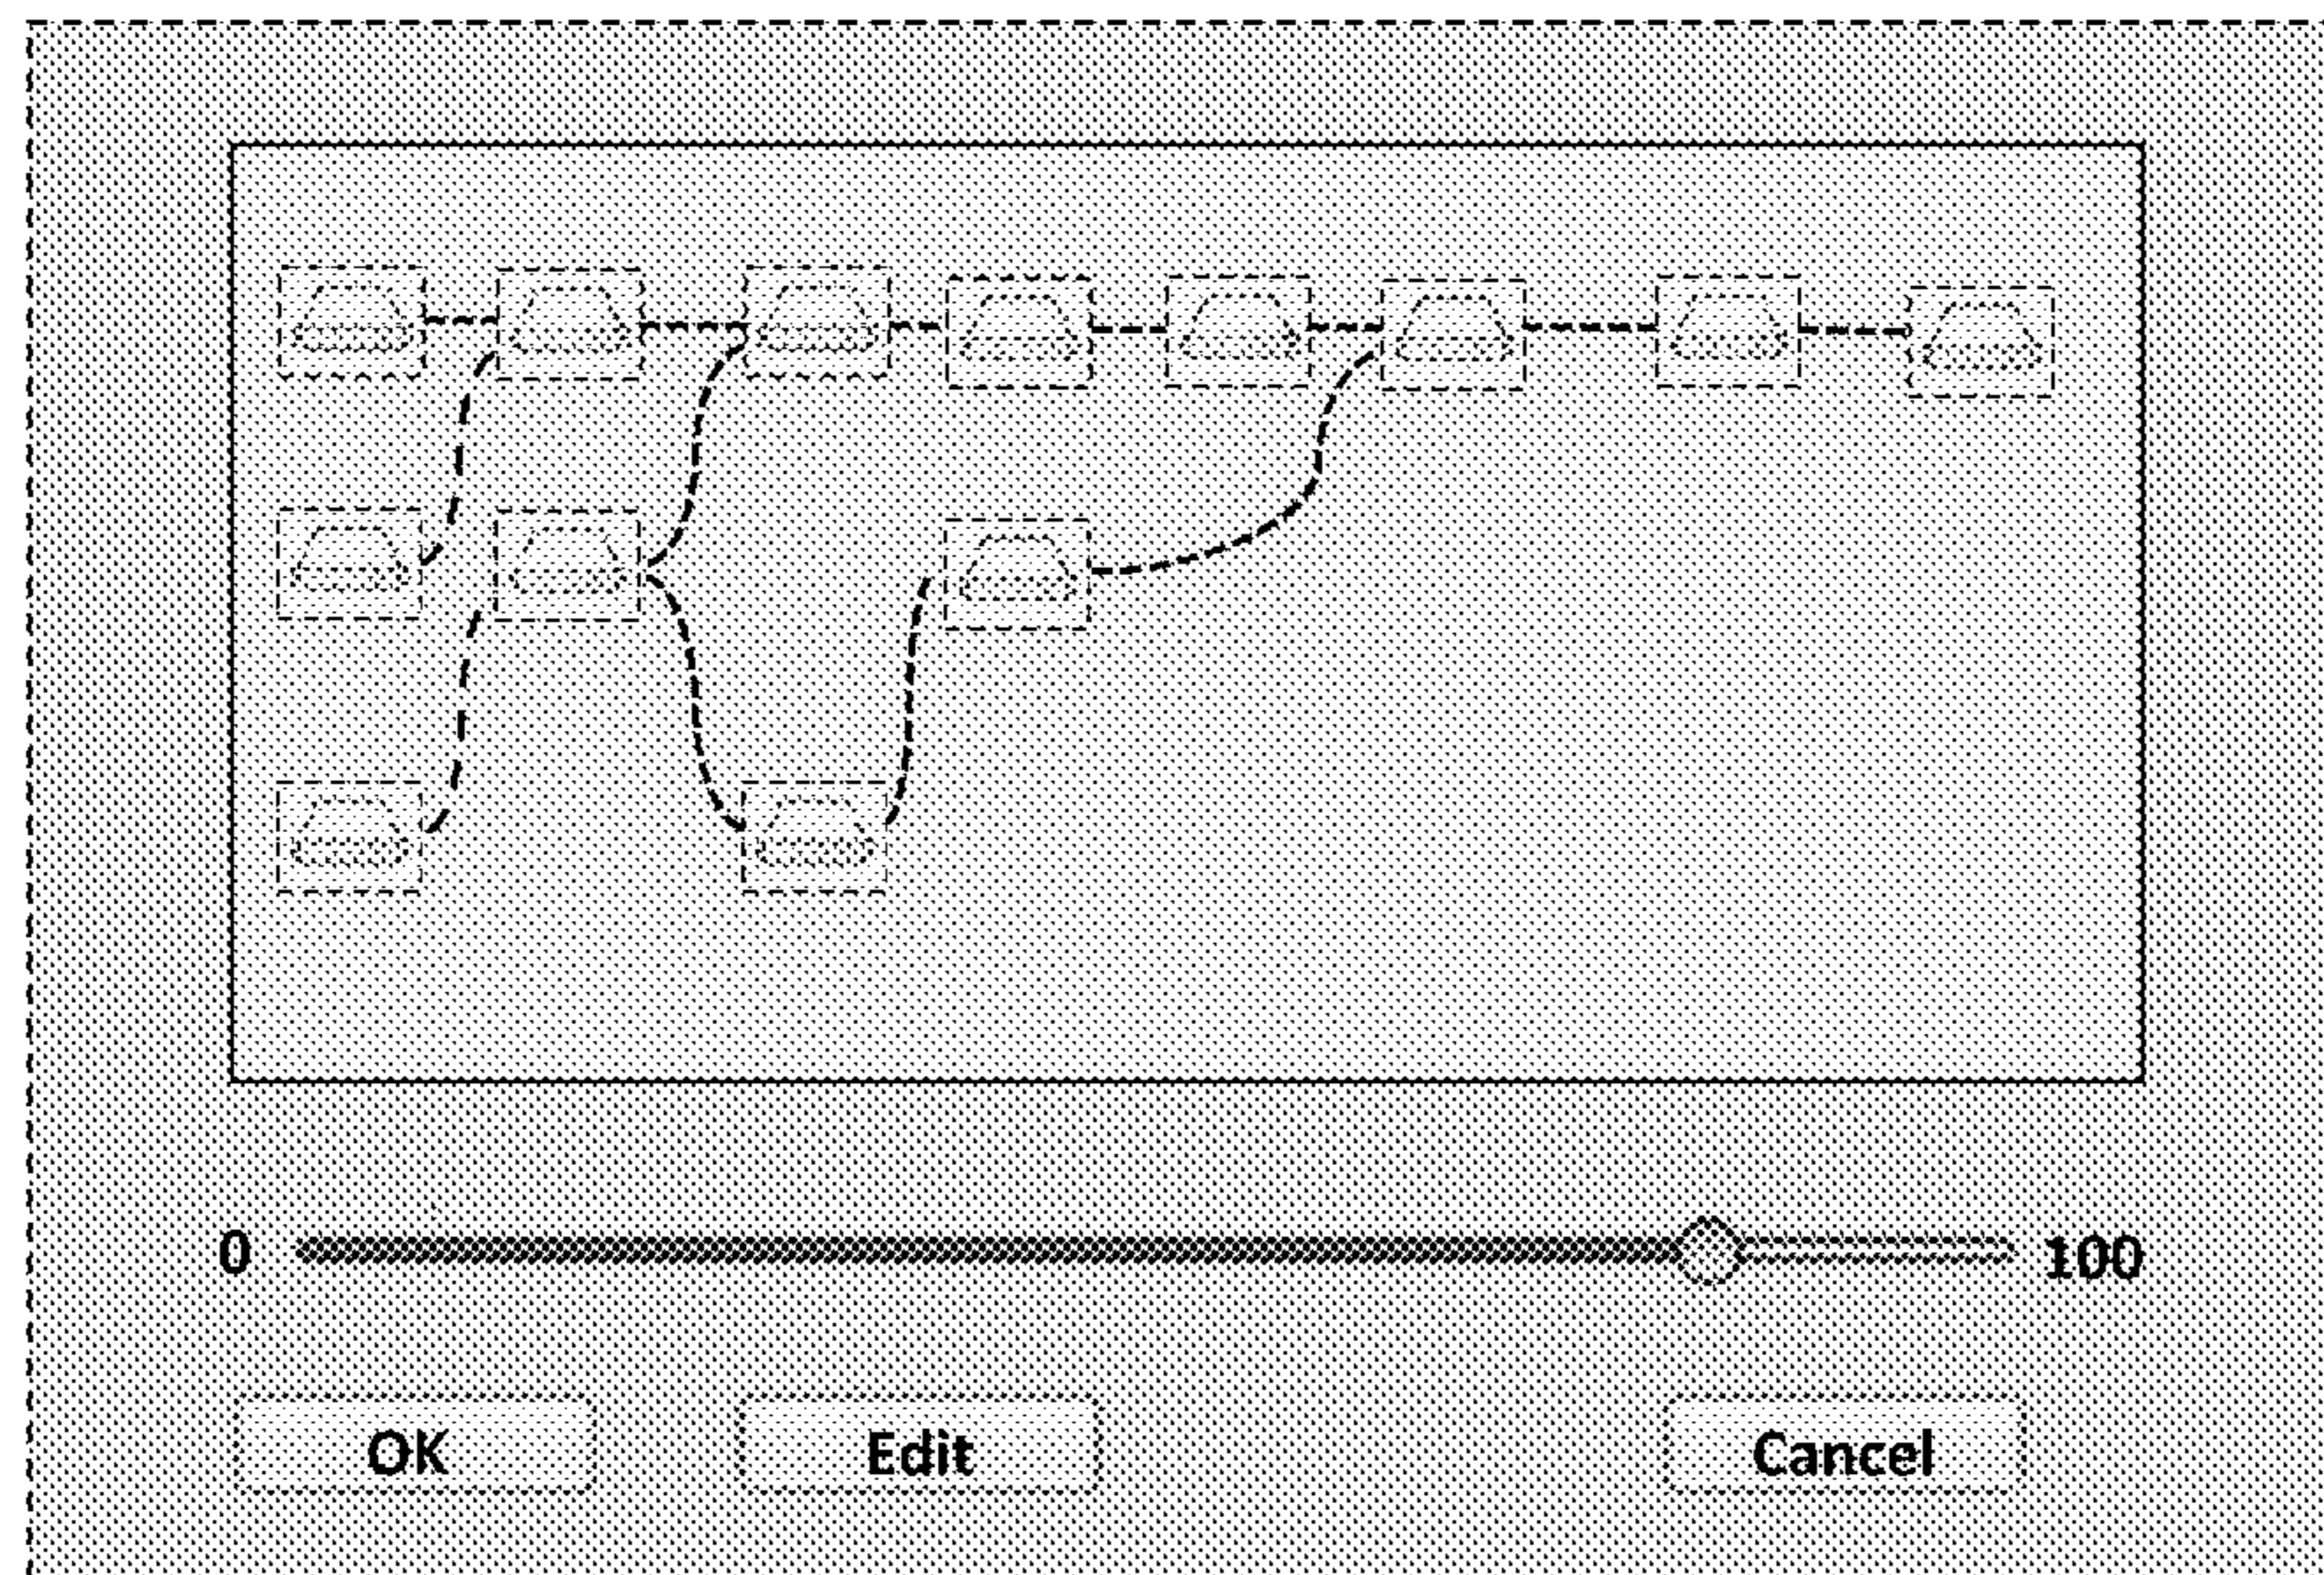

**DESCRIPTION**

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

The sole FIGURE is a front view of the display screen with graphical user interface for a software directed at constructing machine learning workflows through machine learning suggestions showing the design.

The broken lines around the FIGURE are a showing of a display screen that illustrates the environment of the article of manufacture and forms no part of the claimed design. The remaining broken lines, showing portions of the graphical user interface such as icons, icon borders, and links between icons, form no part of the claimed design.
