The ornamental design for an electronic device with transitional graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of an electronic device with transitional graphical user interface showing a first image in a sequence, showing our new design in a state that the electronic device is unfolded;

FIG. 2 is a front view showing a second image thereof, shown in a state that the electronic device is about 60 degrees folded;

FIG. 3 is a perspective view of FIG. 1;

FIG. 4 is a perspective view of FIG. 2;

FIG. 5 is a right-side view of FIG. 1; and,

FIG. 6 is a right-side view of FIG. 2.

The outermost broken lines illustrating portions of an electronic device form no part of the claimed design. The remainder of the broken lines illustrating portions of the graphical user interface forms no part of the claimed design. The appearance of the transitional graphical user interface sequentially transitions between the images shown in FIGS. 1-2. The process or period in which one image transitions to another image forms no part of the claimed design.
