(57) **CLAIM**

The ornamental design for display screen with graphical user interface, as shown and described.

DESCRIPTION

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a first display screen with graphical user interface showing our new design on a first device; FIG. 2 is a front view of a second image thereof; FIG. 3 is a front view of a third image thereof; and, FIG. 4 is a front view of a fourth image thereof.

The appearance of the graphical user interface transitions sequentially between FIGS. 1-4, including in both forward and reverse order. The process or period in which one image transitions to another forms no part of the claimed design. The broken lines showing an electronic device illustrate environmental subject matter, whereas the remaining broken lines showing elements of the graphical user interface illustrate portions of the article. None of the broken lines form part of the claimed design.
