FIG. 1 is a front view of a first image in a sequence for a display screen with transitional graphical user interface showing our new design; and, FIG. 2 is a front view of a second image thereof. The broken lines in the drawings depict part of the display screen and other elements that form no part of the claimed design. The subject matter of this patent includes a process or period in which an image sequentially transitions into another image. This process or period forms no part of the claimed design.
