FIG. 1 is a front view of a first image in a sequence for a display screen with transitional graphical user interface showing our new design; and,

FIG. 2 is a front view of a second image thereof.

The evenly-spaced broken lines in the drawings depict elements that form no part of the claimed design. The dash-dotted broken line showing of a display screen forms no part of the claimed design. The subject matter of this patent includes a process or period in which an image sequentially transitions into another image. This process or period forms no part of the claimed design.

See application file for complete search history.
