(57) **CLAIM**

The ornamental design for a display screen with graphical user interface for data analysis, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with color drawings will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a display screen with graphical user interface for data analysis showing the new design;

FIG. 2 is a front view of a display screen with graphical user interface for data analysis showing the new design, in a second embodiment;

FIG. 3 is a front view of a display screen with graphical user interface for data analysis showing the new design, in a third embodiment;

FIG. 4 is a front view of a display screen with graphical user interface for data analysis showing the new design, in a fourth embodiment;

FIG. 5 is a front view of a display screen with graphical user interface for data analysis showing the new design, in a fifth embodiment; and,

FIG. 6 is a front view of a display screen with graphical user interface for data analysis showing the new design, in a sixth embodiment.

The broken lines depicting portions of the display screen with graphical user interface form no part of the claimed design.
