(57) **CLAIM**

We claim the ornamental design for a base station battery module, as shown and described.

DESCRIPTION

The subject matter of this application relates generally to the subject matter disclosed by U.S. patent application No. 16/443,266, "Modular Battery Pack System with Multivoltage Bus," filed on Jun. 17, 2019.

FIG. **1** is an isometric view of a base station battery module for a modular, stackable energy storage system showing our new design from the top, front and side.

FIG. **2** is a front side elevation view of the base station battery module.

FIG. **3** is a rear side elevation view of the base station battery module.

FIG. **4** is a side elevational view of the base station battery module.

FIG. **5** is a side elevational view of the base station battery module, shown from the side opposite the side shown in FIG. **4**.

FIG. **6** is a top side view of the base station battery module.

FIG. **7** is a bottom side view of the base station battery module; and,

FIG. **8** is an environmental isometric view of the base station battery module, shown with a control module stacked on top.

The broken lines in the drawings are for the purpose of illustrating environmental structure and portions of the battery module that form no part of the claimed design.
