(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with graphical user interface showing a first image in a sequence according to the claimed design; and,

FIG. 2 is a second image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 and 2. The process or period in which one image transitions to another image forms no part of the claimed design.

The shading depicts a contrast in appearance.

The outermost broken lines illustrate an electronic device, which is the environment of the design. The intermediate-length broken lines illustrate the display screen. The remaining broken lines illustrate portions of the graphical user interface. None of the broken lines form part of the claimed design.
