(57) **CLAIM**

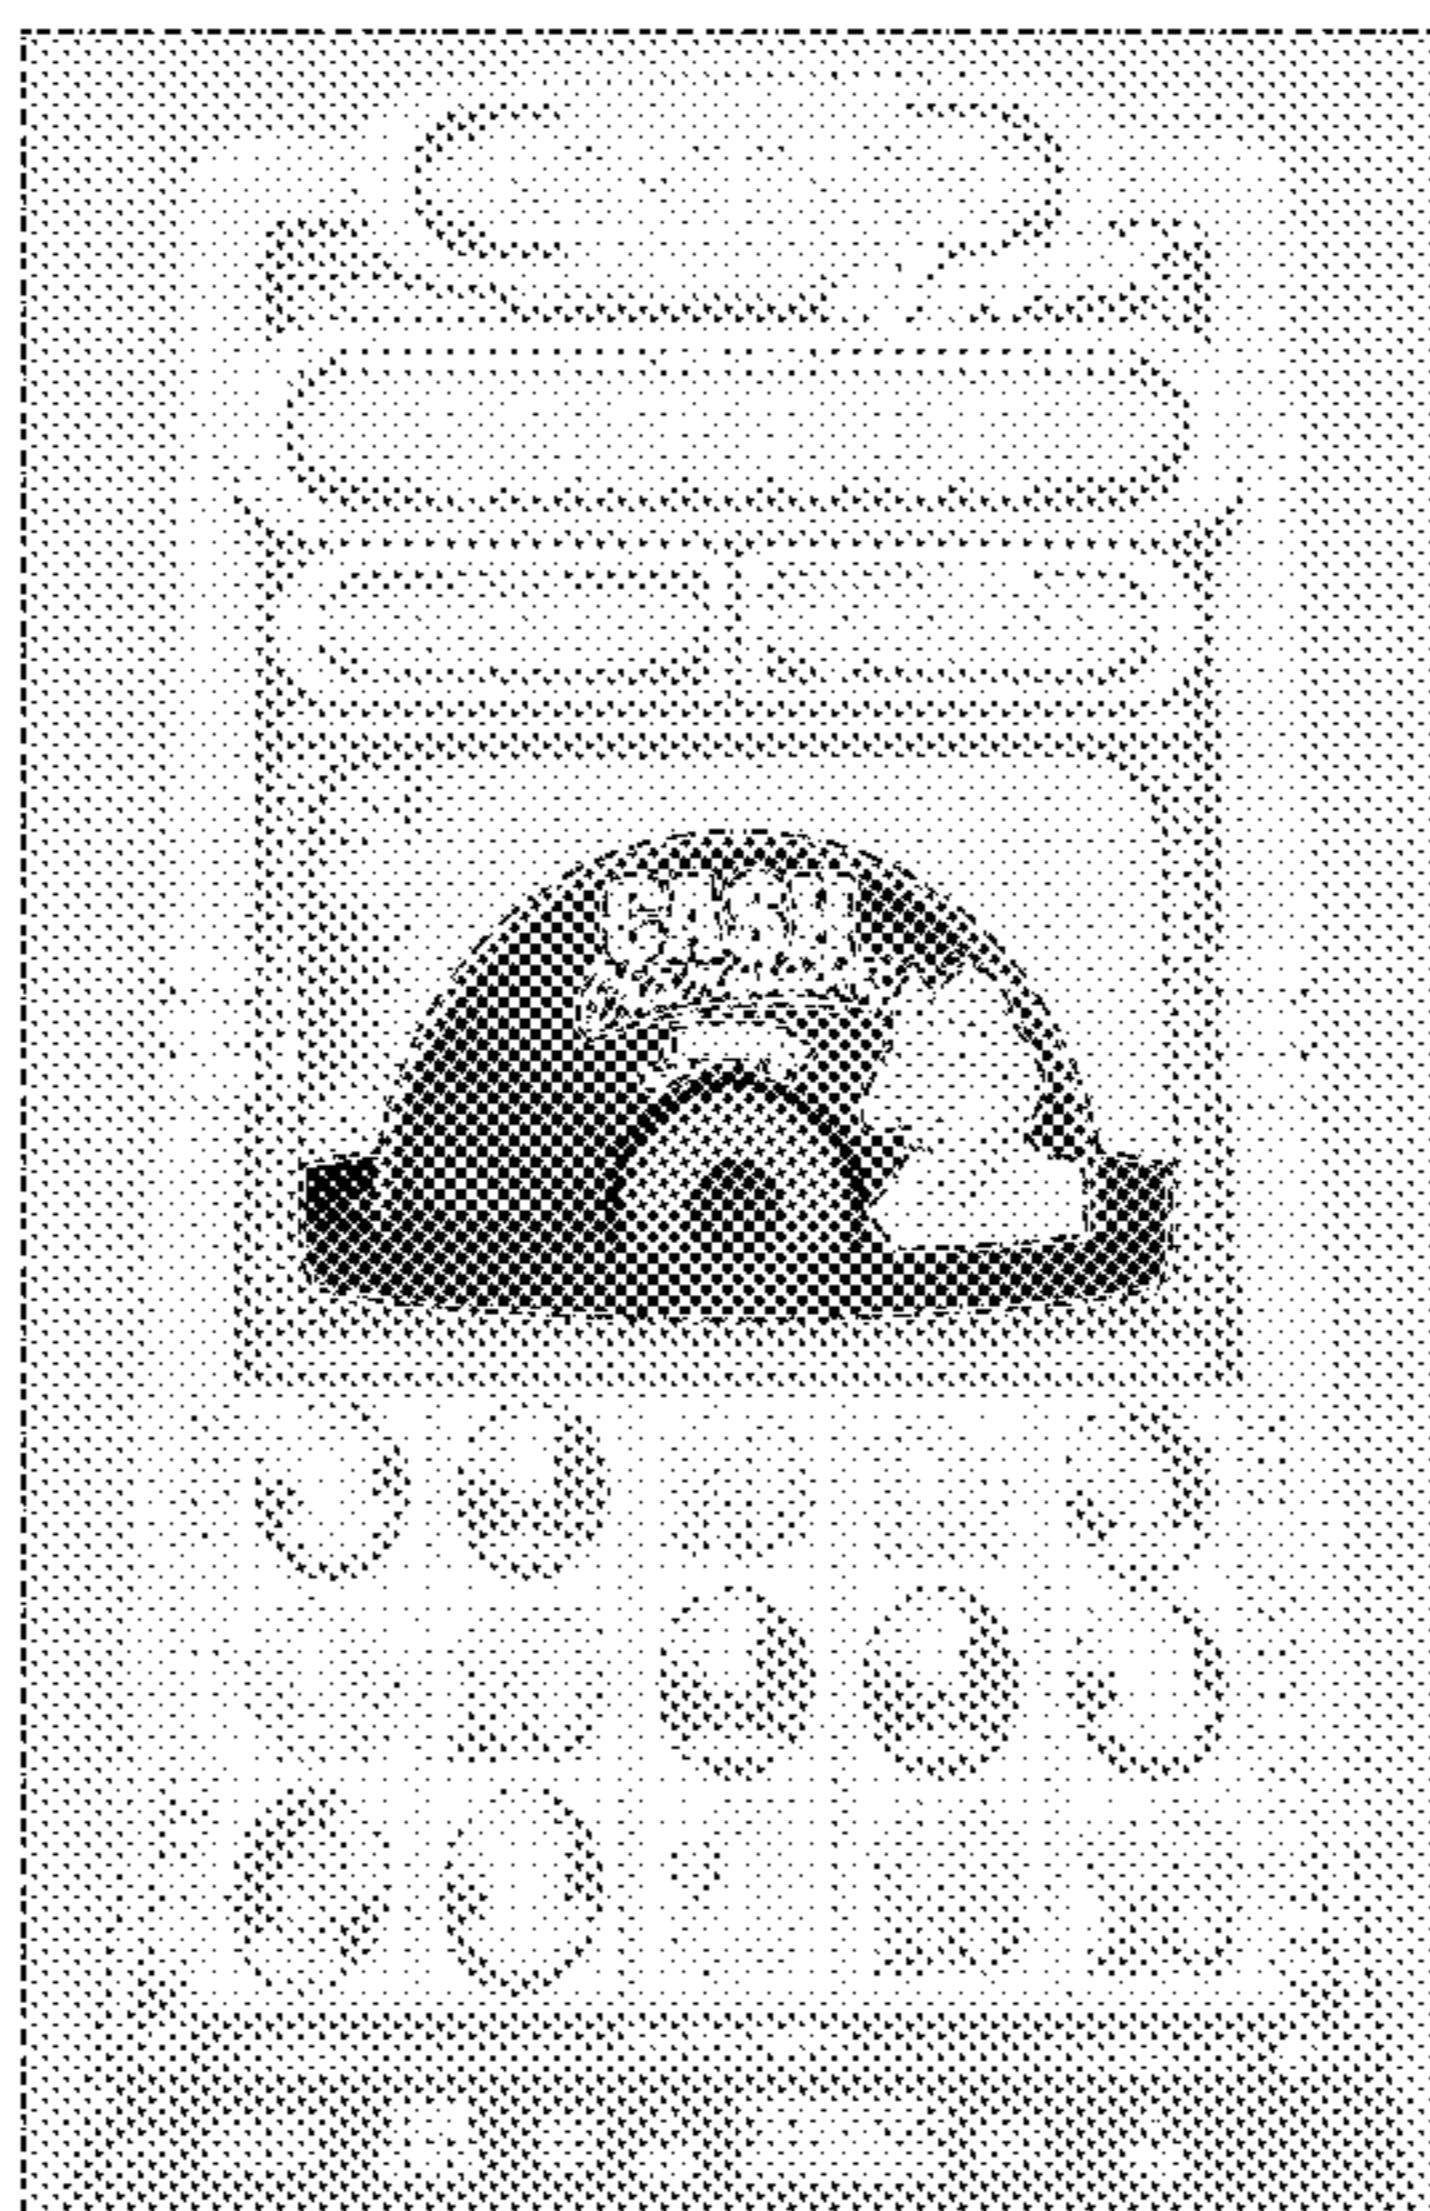

The ornamental design for a display screen or portion thereof with graphical user interface, as shown and described.

DESCRIPTION

The FIGURE is a front view of a display screen or portion thereof with graphical user interface, showing our new design.

The broken line perimeter in the figure illustrates a display screen or portion thereof. The remaining broken lines indicate the boundaries of the claimed design and form no part thereof. In particular, the claimed design is indicated by the relatively dark portions in the figure between the outer broken boundary lines and inner broken boundary lines. The relatively light portions outside the outer broken boundary lines and those bounded by the inner broken boundary lines form no part of the claimed design.
