(57) **CLAIM**

The ornamental design for a robot with a transitional image on a screen display, as shown and described.

**DESCRIPTION**

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is an orthogonal view of a robot with a transitional image on a screen display shown in a first rotational position and displaying a first image on the screen of the claimed design;

FIG. 2 is a second image thereof, now showing a left perspective view with a top and middle section of the robot rotated 90 degrees to the right and elevated, as compared to FIG. 1;

FIG. 3 is a third image thereof, now showing a rear perspective view with a top and middle section of the robot rotated another 90 degrees to the right and further elevated, as compared to FIG. 2;

FIG. 4 is a fourth image thereof, now showing a right perspective view with a top and middle section of the robot rotated 90 degrees to the right and further elevated, as compared to FIG. 3;

FIG. 5 is a fifth image thereof, showing an orthogonal perspective view with a top and middle section of the robot rotated 90 degrees to the right and further elevated, as compared to FIG. 4;

FIG. 6 is a sixth image thereof, in which a top and middle section of the robot are further elevated, as compared to FIG. 5; and,

FIG. 7 is a bottom plan view of the robot shown in the first rotational position.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-7. The process or period in which one image transitions to another image forms no part of the claimed design.
