(57) **CLAIM**

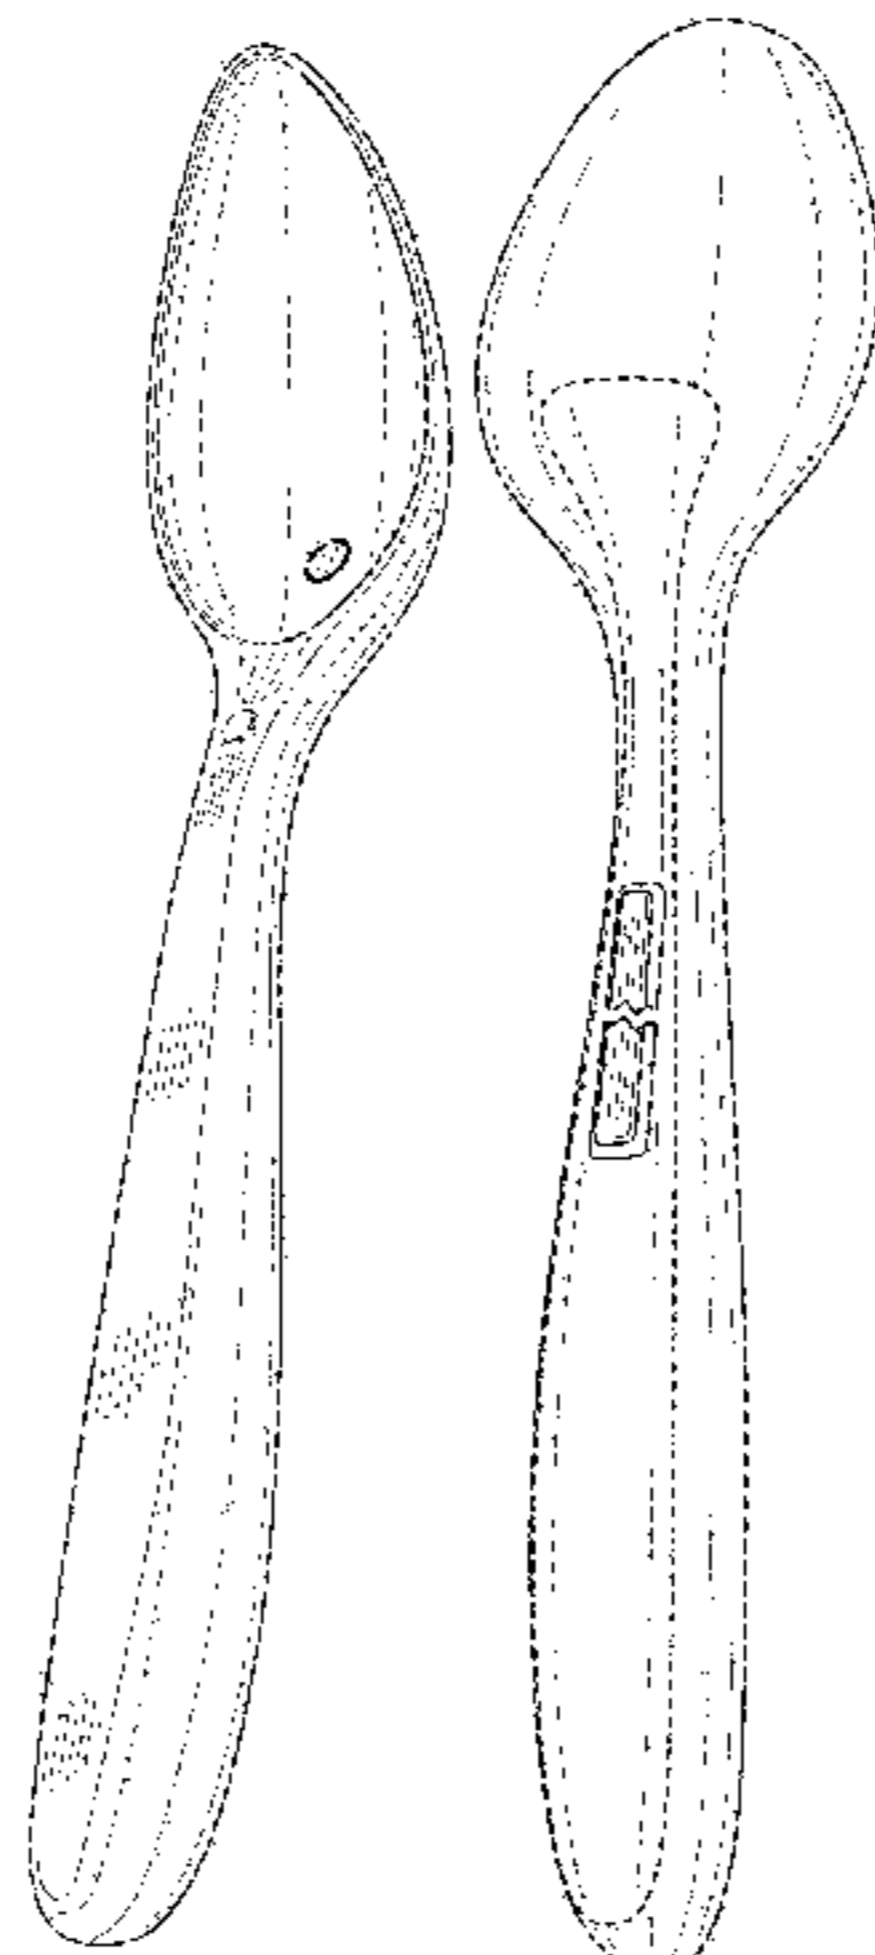

I claim the ornamental design for a utensil, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of the claimed utensil; FIG. 2 is a rear perspective view thereof; FIG. 3 is a front view thereof; FIG. 4 is a rear view thereof; FIG. 5 is a right side view thereof; FIG. 6 is a left side view thereof; FIG. 7 is a top view thereof; and, FIG. 8 is a bottom view thereof.

The ornamental design which is claimed is shown in solid lines in the drawings. Broken lines of equal or substantially equal length dashes in the figures are for illustrative purposes only and form no part of the claimed design. Broken lines having a jagged element show that no particular length of that portion of the article is claimed, such lines and any portion of the article between such lines form no part of the claimed design. In this regard, the second and eighth embodiments include an object having a broken line having a jagged element whereby it should be understood that this line type indicates that the length of this object may extend from at or near an interface between the handle and a functional end of the utensil (e.g., spoon bowl) to at or near a distal end of the handle furthest from the interface between the handle and the functional end. Oblique lines show a transparent, translucent, highly polished, or reflective surface, and not surface ornamentation.

1 Claim, 7 Drawing Sheets
