(57) **CLAIM**

The ornamental design for a display screen or portion thereof with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof with graphical user interface according to the claimed design; and,

FIG. 2 is an enlarged view of the encircled portion of FIG. 1.

The dash-dot-dash broken lines in the drawings illustrate boundaries of the display screen or portion thereof that form no part of the claimed design.

The dash-dot-dash broken lines in the drawings illustrate portions of the graphical user interface that form no part of the claimed design.

The dash-dot-dot broken lines in the drawings indicating the encircled portions form no part of the claimed design.

In the drawings, the first hatch shading shown at the upper, first group and the second hatch shading shown at the lower, second group represent contrast in appearance, although no particular colors are claimed. Additionally, the heavier line weight of the first hatch shading represents higher opacity relative to the lower line weight of the second hatch shading. Any pattern formed by any of the hatch shading forms no part of the claimed design.
