(57) **CLAIM**

The ornamental design for a display screen or portion thereof with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of the first image in a sequence of a first embodiment of a display screen or portion thereof with transitional graphical user interface, showing our new design;

FIG. 2 is a front view of the second image thereof;

FIG. 3 is a front view of the first image in a sequence of a second embodiment of a display screen or portion thereof with transitional graphical user interface, showing our new design; and,

FIG. 4 is a front view of the second image thereof.

The appearance of the transitional graphical user interface sequentially transitions between the images shown in FIGS. 1-2 and 3-4, respectively. The process or period in which one image transitions to another forms no part of the claimed design.

The outer perimeter illustrated by dashed broken lines in FIGS. 1-4 represents a display screen or portion thereof and forms no part of the claimed design. The contrast shown in weight of the lines in the figures represents a contrast of appearance. The remaining dashed broken lines shown in the drawings illustrate portions of the graphical user interface that form no part of the claimed design.
