CLAIM

The ornamental design for a display panel with animated graphical user interface for gate boarding information, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with colored drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee

FIG. 1 is a front view of a first image in a sequence of images of an animated graphical user interface of a first version of the new design;

FIG. 2 is a front view of a second image of the sequence of images of the animated graphical user interface illustrated in FIG. 1;

FIG. 3 is a front view of a third image of the sequence of images of the animated graphical user interface illustrated in FIG. 1;

FIG. 4 is a front view of a first image in a sequence of images of an animated graphical user interface of a second version of the new design;

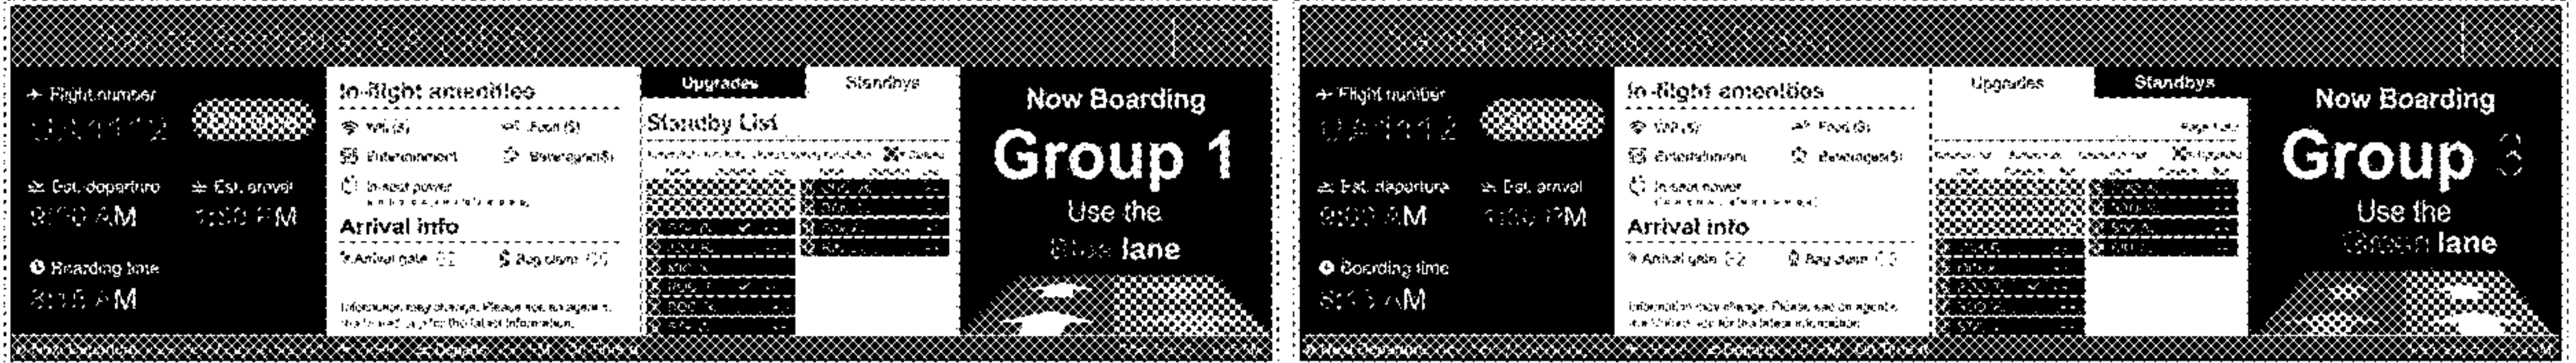

FIG. 5 is a front view of a second image in the sequence of images of the animated graphical user interface illustrated in FIGS. 4; and,

FIG. 6 is a front view of a third image in the sequence of images of the animated graphical user interface illustrated in FIG. 4.

The outermost broken line showing of a display screen and the other broken line showing of elements of the graphical user interface illustrate portions of the article and do not form part of the claimed design.

The appearance of the animated graphical user interface transitions sequentially between the images shown in FIGS. 1, 2, and 3, in the first version, and between the images shown in FIGS. 4, 5, and 6, in the second version. The

(Continued)

process or period in which one image transitions to another forms no part of the claimed design.
