(57) **CLAIM**

The ornamental design for a mount and module combination for a mobile communications device, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a mount and module combination for a mobile communications device.

FIG. 2 is front view of the mount and module combination for a mobile communications device.

FIG. 3 is a rear view of the mount and module combination for a mobile communications device.

FIG. 4 is a side view of the mount and module combination for a mobile communications device.

FIG. 5 is an opposite side view of the mount and module combination for a mobile communications device.

FIG. 6 is an end view of the mount and module combination for a mobile communications device.

FIG. 7 is an opposite end view of the mount and module combination for a mobile communications device.

FIG. 8 is a perspective view of the mount for the mount and module combination for a mobile communications device.

FIG. 9 is a front view of the mount for the mount and module combination for a mobile communications device.

FIG. 10 is a rear view of the mount for the mount and module combination for a mobile communications device.

FIG. 11 is an end view of the mount for the mount and module combination for a mobile communications device.

FIG. 12 is an opposite end view of the mount for the mount and module combination for a mobile communications device.

FIG. 13 is a side view of the mount for the mount and module combination for a mobile communications device.

FIG. 14 is an opposite side view of the mount for the mount and module combination for a mobile communications device.

FIG. 15 is a perspective view of the module for the mount and module combination for a mobile communications device.

FIG. 16 is a front view of the module for the mount and module combination for a mobile communications device.

(Continued)

FIG. 17 is a rear view of the module for the mount and module combination for a mobile communications device. FIG. 18 is an end view of the module for the mount and module combination for a mobile communications device. FIG. 19 is an opposite end view of the module for the mount and module combination for a mobile communications device. FIG. 20 is a side view of the module for the mount and module combination for a mobile communications device; and, FIG. 21 is an opposite side view of the module for the mount and module combination for a mobile communications device. The broken line in the drawings discloses the unclaimed portions of the mount and module combination for a mobile communications device only and forms no part of the claimed design.

1 Claim, 12 Drawing Sheets
