(57) CLAIM

The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with animated graphical user interface showing a first image of the claimed design in a first embodiment;

FIG. 2 is a second image thereof;

FIG. 3 is a third image thereof;

FIG. 4 is a front view of a display screen with animated graphical user interface showing a first image of the claimed design in a second embodiment;

FIG. 5 is a second image thereof; and,

FIG. 6 is a third image thereof.

The outer broken lines in the figures show a display screen or portion thereof, or an electronic device having a display screen, and form no part of the claimed design. The other broken lines in the figures show portions of the animated graphical user interface that form no part of the claimed design.

The appearance of the animated image sequentially transitions between the images shown in FIGS. 1-3 and 4-6, respectively. The process or period in which one image transitions to another forms no part of the claimed design.
