(57) **CLAIM**

We claim the ornamental design for a display screen or portion thereof with a transitional graphical user interface, as shown and described.

DESCRIPTION

The present application is related to U.S. patent application Ser. No. 16/860,818, filed Apr. 28, 2020, entitled “Systems and Methods for Short Term Persistence by Unlocking Additional Symbol Positions,” the disclosure of which is hereby incorporated by reference in its entirety.

FIG. 1 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a first embodiment of our new design;

FIG. 2 is a front view thereof showing a second image in the sequence;

FIG. 3 is a front view thereof showing a third image in the sequence;

FIG. 4 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a second embodiment of our new design;

FIG. 5 is a front view thereof showing a second image in the sequence;

FIG. 6 is a front view thereof showing a third image in the sequence;

FIG. 7 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a third embodiment of our new design;

FIG. 8 is a front view thereof showing a second image in the sequence;

FIG. 9 is a front view thereof showing a third image in the sequence;

FIG. 10 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a fourth embodiment of our new design;

FIG. 11 is a front view thereof showing a second image in the sequence;

FIG. 12 is a front view thereof showing a third image in the sequence;

FIG. 13 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a fifth embodiment of our new design;

FIG. 14 is a front view thereof showing a second image in the sequence;

FIG. 15 is a front view thereof showing a third image in the sequence;

FIG. 16 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a sixth embodiment of our new design;

FIG. 17 is a front view thereof showing a second image in the sequence;

FIG. 18 is a front view thereof showing a third image in the sequence;

FIG. 19 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a seventh embodiment of our new design;

FIG. 20 is a front view thereof showing a second image in the sequence;

FIG. 21 is a front view thereof showing a third image in the sequence;

FIG. 22 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to an eighth embodiment of our new design;

FIG. 23 is a front view thereof showing a second image in the sequence;

FIG. 24 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a ninth embodiment of our new design;

FIG. 25 is a front view thereof showing a second image in the sequence;

FIG. 26 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a tenth embodiment of our new design;

FIG. 27 is a front view thereof showing a second image in the sequence;

FIG. 28 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to an eleventh embodiment of our new design;

FIG. 29 is a front view thereof showing a second image in the sequence;

FIG. 30 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a twelfth embodiment of our new design;

FIG. 31 is a front view thereof showing a second image in the sequence;

FIG. 32 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a thirteenth embodiment of our new design;

FIG. 33 is a front view thereof showing a second image in the sequence;

FIG. 34 is a front view of a display screen or portion thereof with a transitional graphical user interface showing a first image in a sequence according to a fourteenth embodiment of our new design; and,

FIG. 35 is a front view thereof showing a second image in the sequence.

The outermost broken line illustrates a display screen or portion thereof and forms no part of the claimed design. Stippling in the drawings is used to indicate a contrast in appearance, with no specific color or other feature being claimed. The remaining broken lines represent elements of the display screen or portion thereof with a transitional graphical user interface that form no part of the claimed design. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-3 in the first embodiment, FIGS. 4-6 in the second embodiment, FIGS. 7-9 in the third embodiment, FIGS. 10-12 in the fourth embodiment, FIGS. 13-15 in the fifth embodiment, FIGS. 16-18 in the sixth embodiment, FIGS. 19-21 in the seventh embodiment, FIGS. 22-23 in the eighth embodiment, FIGS. 24-25 in the ninth embodiment, FIGS. 26-27 in

the tenth embodiment, FIGS. 28-29 in the eleventh embodiment, FIGS. 30-31 in the twelfth embodiment, FIGS. 32-33 in the thirteenth embodiment, and FIGS. 34-35 in the fourteenth embodiment. The process or period in which one image transitions to another image forms no part of the claimed design.
