(57) **CLAIM**

The ornamental design for a display screen or portion thereof with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence according to a first embodiment of our design for a display screen or portion thereof with transitional graphical user interface;

FIG. 2 is a front view of a second image in the sequence thereof;

FIG. 3 is a front view of a first image in a sequence according to a second embodiment of our design for a display screen or portion thereof with transitional graphical user interface;

FIG. 4 is a front view of a second image in the sequence thereof;

FIG. 5 is a front view of a first image in a sequence according to a third embodiment of our design for a display screen or portion thereof with transitional graphical user interface;

FIG. 6 is a front view of a second image in the sequence thereof;

FIG. 7 is a front view of a first image in a sequence according to a fourth embodiment of our design for a display screen or portion thereof with transitional graphical user interface; and,

FIG. 8 is a front view of a second image in the sequence thereof.

The appearance of the transitional image transitions between the images shown in FIGS. 1-2, between the images shown in FIGS. 3-4, between the images shown in FIGS. 5-6, and between the images shown in FIGS. 7-8, respectively. The process or period in which one images transitions to another forms no part of the claimed design.

The shading in FIGS. 5-8 is a part of the claimed design.

The outermost broken line rounded rectangle showing an electronic device illustrates environmental subject matter. The broken line showing of a display screen, and all other
