(57) **CLAIM**

The ornamental design for a display screen or portion thereof with graphical user interface for analyte data presentation, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawings will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 shows a front view of a first embodiment of a display screen or portion thereof with graphical user interface for analyte data presentation that incorporates the new, original, and ornamental design;

FIG. 2 shows a front view of a second embodiment of the display screen or portion thereof with graphical user interface for analyte data presentation that incorporates the new, original, and ornamental design;

FIG. 3 shows a front view of a third embodiment of the display screen or portion thereof with graphical user interface for analyte data presentation that incorporates the new, original, and ornamental design;

FIG. 4 shows a front view of a fourth embodiment of the display screen or portion thereof with graphical user interface for analyte data presentation that incorporates the new, original, and ornamental design;

(Continued)

FIG. 5 shows a front view of a fifth embodiment of the display screen or portion thereof with graphical user interface for analyte data presentation that incorporates the new, original, and ornamental design; and, FIG. 6 shows a front view of a sixth embodiment of the display screen or portion thereof with graphical user interface for analyte data presentation that incorporates the new, original, and ornamental design. The outermost broken line illustrates an electronic device that forms no part of the claimed design. The broken line at the periphery of the figures illustrates the display screen and forms no part of the claimed design. The dashed broken lines in the figures are marker indicators and form part of the claimed design.
