(57) **CLAIM**

The ornamental design for a packaging bag, as shown and described.

DESCRIPTION

- 1. Packaging bag
- 1.1 : Front
- 1.2 : Back
- 1.3 : Right
- 1.4 : Top
- 1.5 : Bottom
- 1.6 : Reference front view

The present article relates to a packaging bag for sealing medicine; wherein parts of two substantially rectangular front and rear sheet-like materials are bonded by heat-sealing; as shown in the reference front view, an accommodation part in which an object to be accommodated; such as medicine, is accommodated; and which is composed of a protruding convex sealed part of bottom and side sealed parts is provided on the upper opening side of the packaging bag; in the top opening, a tab part is formed on the front side sheet-like material such that the outer edge part of the top opening is located below the upper opening end of the rear side sheet-like material; furthermore, side end sealed parts are formed on both side ends that are located lower than the top opening outer edge part of the front side sheet-like material; during use, a consumer can remove the accommodated medicine or the like by pinching the tab part of the front side sheet-like material and the rear side sheet-like material and peeling the respective sealed parts in the separation direction; since the left-side view is symmetrical

(Continued)

to the right-side view, it has been omitted; note that in the reference front view, the shaded portion corresponds to the heat-sealed parts.
