(21) Appl. No.: **29/778,961**

(57) **CLAIM**

(22) Filed: **Apr. 15, 2021**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

Related U.S. Application Data

(63) Continuation of application No. 16/814,925, filed on Mar. 10, 2020, now Pat. No. 11,278,661.

This application is related to U.S. application Ser. No. 29/776,041, filed Mar. 26, 2021, titled Display Screen with Animated Graphical User Interface, which is incorporated by reference and made a part of this specification.

(51) **LOC (14) Cl.** **14-04**

This invention was made with U.S. Government support under Contract No. DK120234, awarded by the National Institutes of Health. The Government has certain rights in the invention.

(52) **U.S. Cl.**

See application file for complete search history.

FIG. 1 is a front view of a first image of an embodiment of a display screen with transitional graphical user interface embodying the new design; and,

FIG. 2 is a front view of a second image thereof.

Broken lines are used to illustrate features and/or environmental structures and form no part of the claimed design, including broken lines showing the display screen and the remainder of the graphical user interface.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 to 2. The process or period in which one image transitions to another image forms no part of the claimed design.
