(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first embodiment of a display screen with transitional graphical user interface showing a first image in a sequence, showing our new design; FIG. 2 is a front view of a second image thereof; FIG. 3 is a front view of a third image thereof; FIG. 4 is a front view of a fourth image thereof; FIG. 5 is a front view of a second embodiment of a display screen with transitional graphical user interface depicted on an electronic device showing a first image in a sequence, showing our new design in a state that the electronic device is unfolded; FIG. 6 is a front view showing a second image thereof, shown in a state that the electronic device is about 30 degrees folded; FIG. 7 is a front view showing a third image thereof, shown in a state that the electronic device is about 60 degrees folded; FIG. 8 is a front view showing a fourth image thereof, shown in a state that the electronic device is about 90 degrees folded; FIG. 9 is a perspective view of FIG. 5; FIG. 10 is a perspective view of FIG. 6; FIG. 11 is a perspective view of FIG. 7; FIG. 12 is a perspective view of FIG. 8; FIG. 13 is a right-side view of FIG. 5; FIG. 14 is a right-side view FIG. 6; FIG. 15 is a right-side view FIG. 7; and, FIG. 16 is a right-side view FIG. 8.

The appearance of the transitional graphical user interface sequentially transitions between the images shown in FIGS. 1-4, and FIGS. 5-8, respectively. The process or period in which one image transitions to another forms no part of the claimed design.

The outermost broken lines illustrating a display screen and portions of an electronic device form no part of the claimed design. The remainder of the broken lines illustrating portions of the graphical user interface forms no part of the claimed design.
