(57) **CLAIM**

The ornamental design for a portion of a display screen with animated ray, as shown and described.

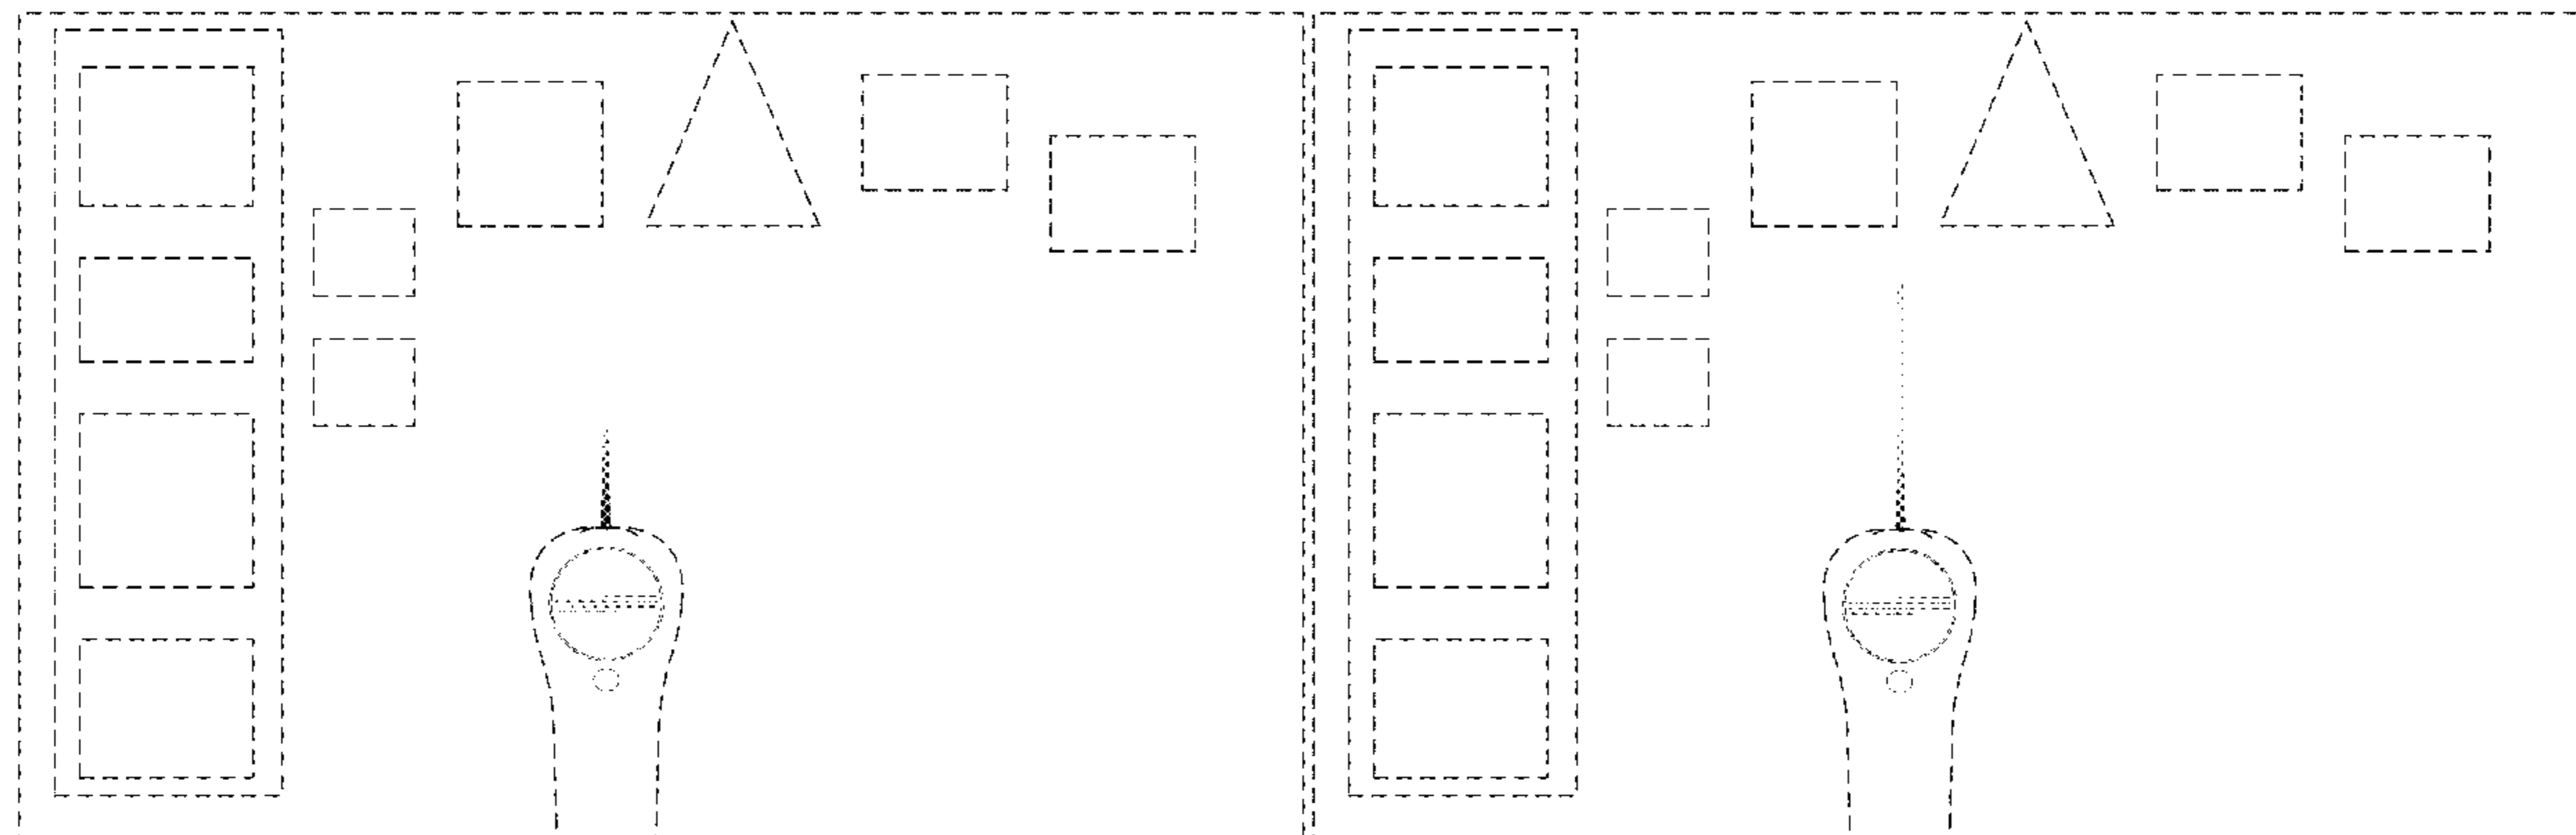

DESCRIPTION

FIG. 1 is a front view of a portion of a display screen with animated ray showing a first image in a sequence according to a first embodiment of our new design; FIG. 2 is a front view showing a second image thereof; FIG. 3 is a front view showing a third image thereof; FIG. 4 is a front view showing a fourth image thereof; FIG. 5 is a front view of a portion of a display screen with animated ray showing a first image in a sequence according to a second embodiment of our new design; FIG. 6 is a front view showing a second image thereof; FIG. 7 is a front view showing a third image thereof; and, FIG. 8 is a front view showing a fourth image thereof.

The outer perimeter shown in dashed broken lines in FIGS. 1-8 illustrates a portion of a display screen that forms no part of the claimed design. The dashed lines in the lower central region of FIG. 1-8 illustrate a handheld controller that forms no part of the claimed design. The remaining dashed broken lines in FIGS. 1-8 illustrate elements of a graphical user interface that form no part of the claimed design.

In the first embodiment, the appearance of the portion of a display screen with animated ray sequentially transitions between the images shown in FIGS. 1-4. In the second embodiment, the appearance of the portion of a display screen with animated ray sequentially transitions between the images shown in FIGS. 5-8. The process or period in which one image transitions to another in these sequences forms no part of the claimed design.

1 Claim, 8 Drawing Sheets
