FIG. 7C is a bottom elevation view thereof in which the spheres or beads are the third color at a third transient temporal moment.

The appearance of the therapy pack design transitions back and forth sequentially between the first, second, and third bead color displays, depicted in grayscale, in the A, B, and C views of each numbered figure set described above and shown. Grayscale shading of the beads in the figures is representative of color generically and is not intended to represent specific colors or otherwise limit the colors or combinations thereof claimed, except that each grayscale shade is representative of a different color. The process or period in which one appearance transitions to another forms no part of the claimed design. Other structure illustrated in broken lines is also provided to illustrate the environment of the invention but is not otherwise part of the claimed design.
