FIG. 6A is a right-side elevation view thereof in which the spheres or beads are the first color at a first transient temporal moment;

FIG. 6B is a right-side elevation view thereof in which the spheres or beads are the second color at a second transient temporal moment;

FIG. 6C is a right-side elevation view thereof in which the spheres or beads are the third color at a third transient temporal moment;

FIG. 7A is a perspective view of a therapy pack, showing the new design in which the spheres or beads are the first color at a first transient temporal moment;

FIG. 7B is a perspective view of a therapy pack, showing the new design in which the spheres or beads are the second color at a second transient temporal moment; and,

FIG. 7C is a perspective view of a therapy pack, showing the new design in which the spheres or beads are the third color at a third transient temporal moment.

The appearance of the therapy pack design transitions back and forth sequentially between the first, second, and third bead color displays, depicted in grayscale, in the A, B, and C views of each numbered figure set described above and shown. Grayscale shading of the beads in the figures is representative of color generically and is not intended to represent specific colors or otherwise limit the colors or

combinations thereof claimed, except that each grayscale shade is representative of a different color. The process or period in which one appearance transitions to another forms no part of the claimed design. The broken lines in the drawings depict portions of the therapy pack which are environment only and which form no part of the claimed design.
