(57) **CLAIM**

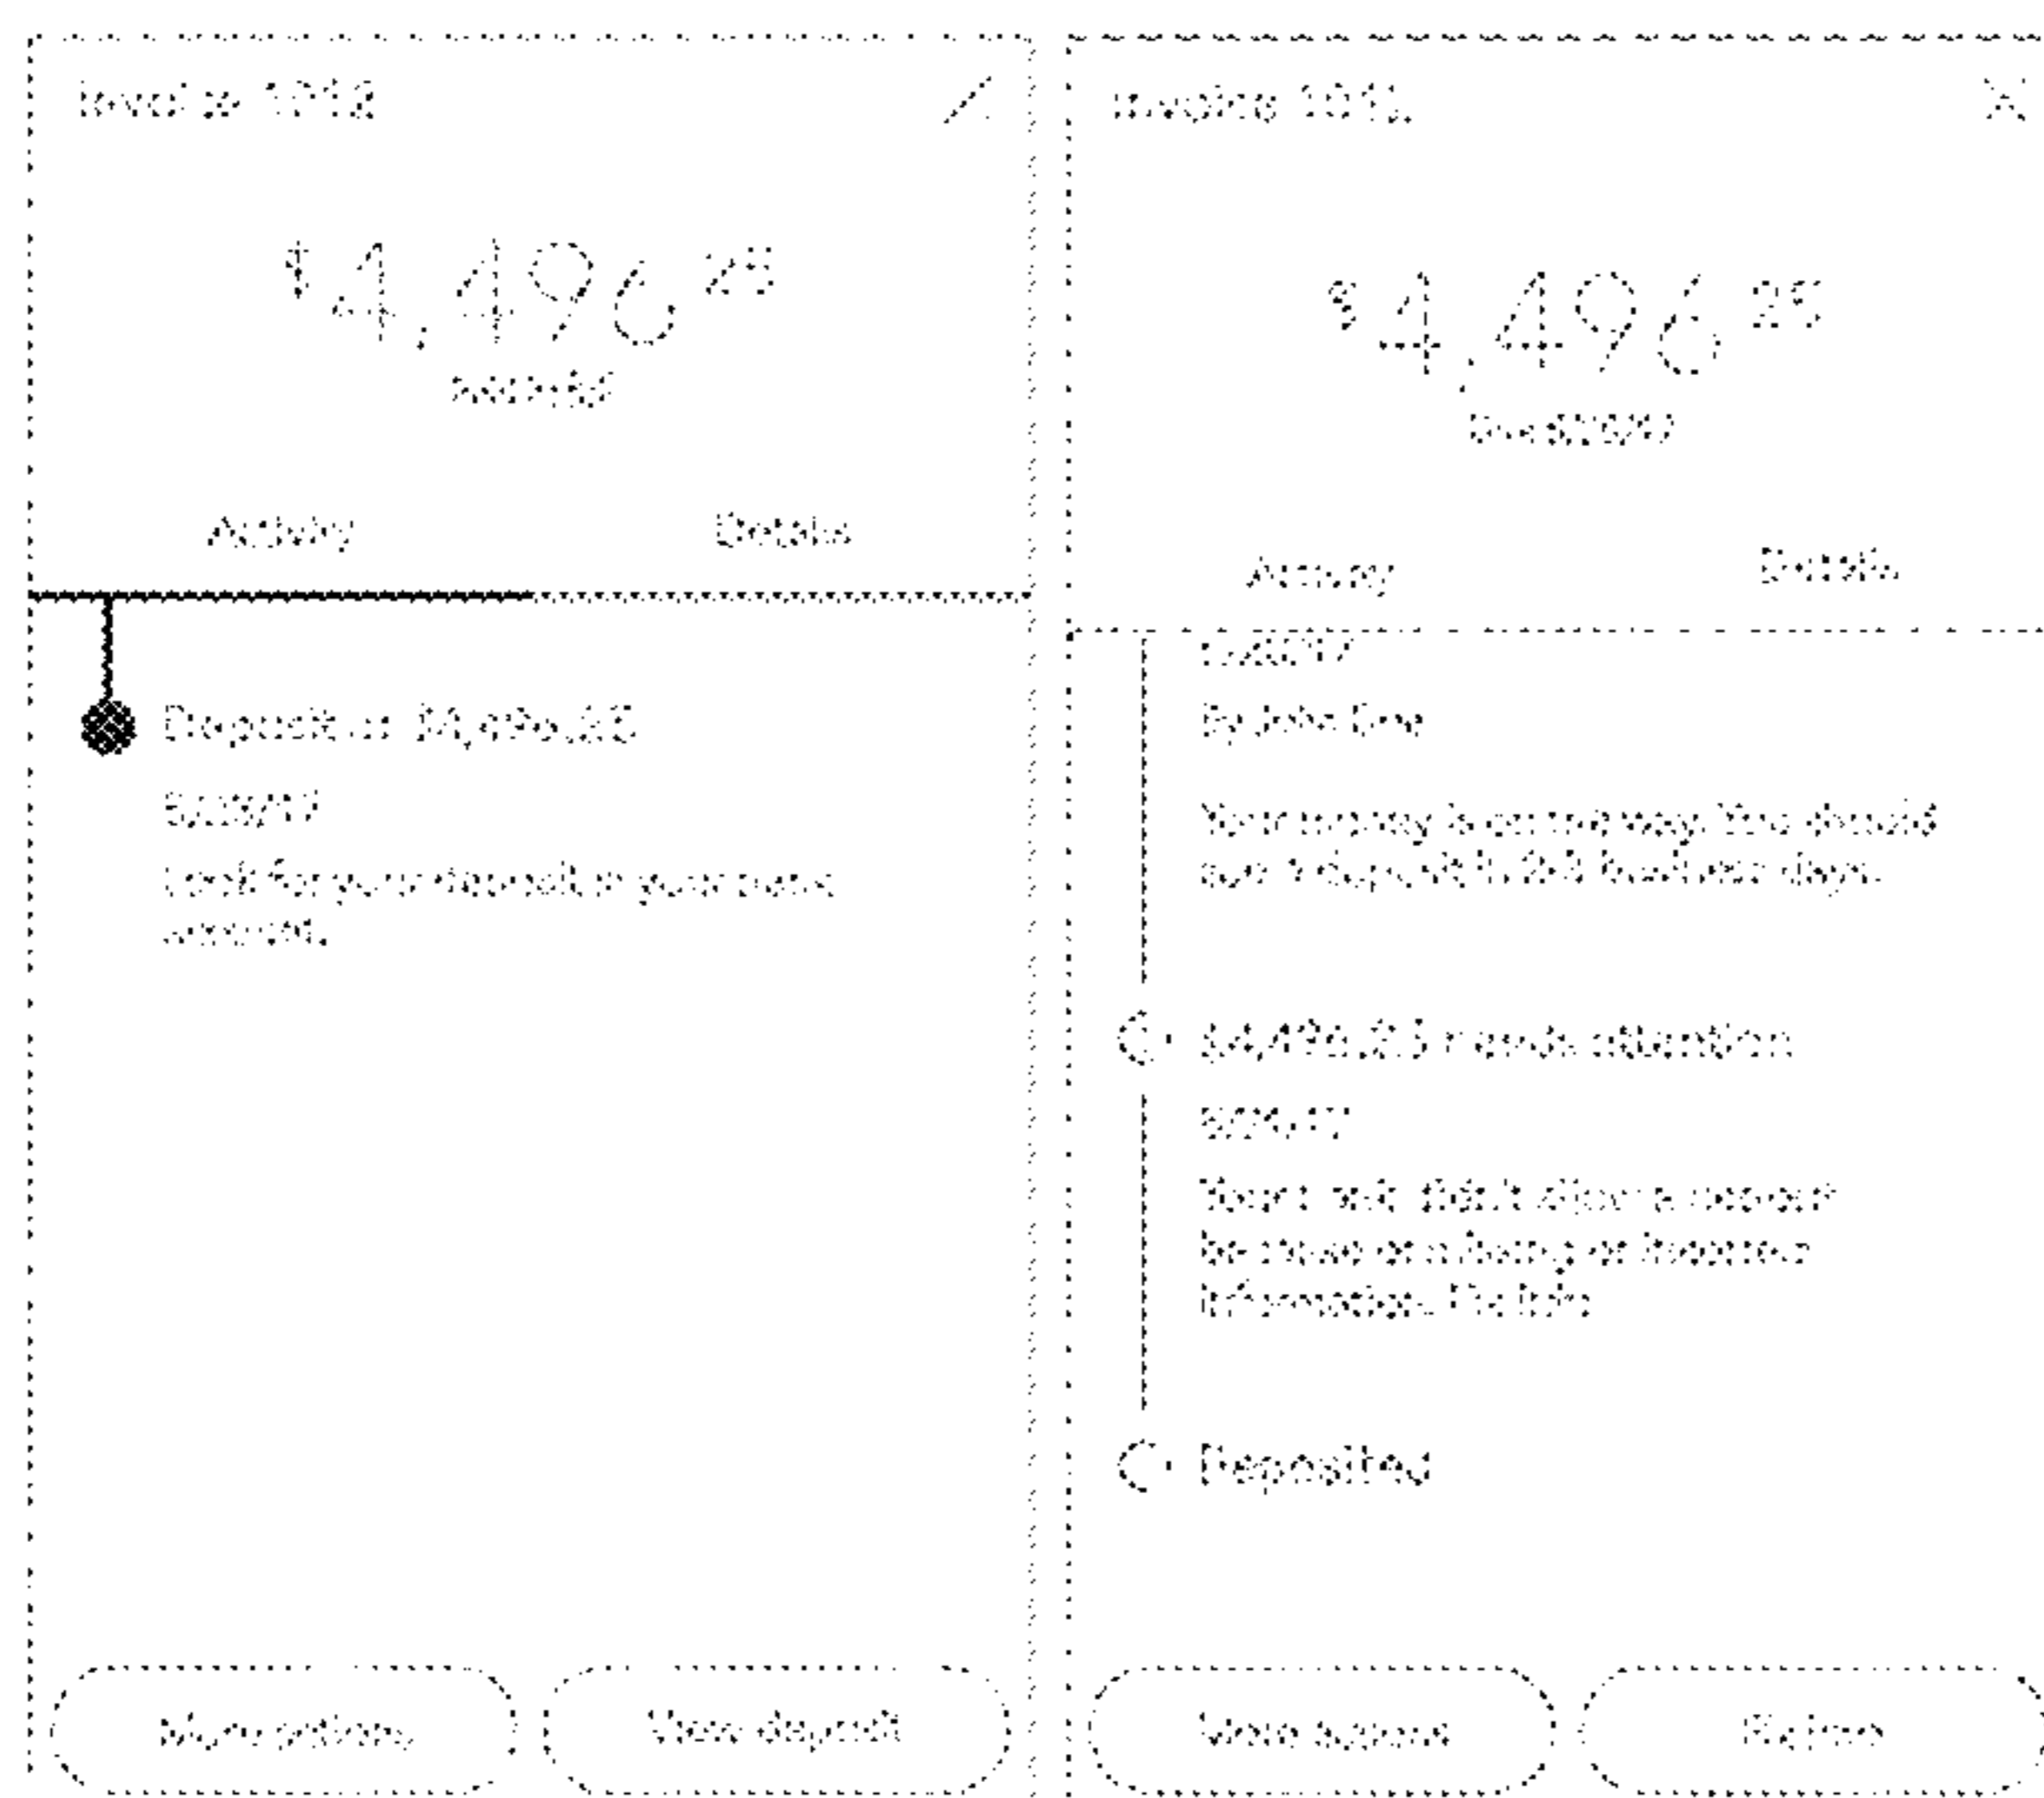

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with graphical user interface, showing a first transitional image; FIG. 2 is a front view of a display screen with graphical user interface, showing a second transitional image; and, FIG. 3 is a front view of a display screen with graphical user interface, showing a third transitional image.

The broken lines showing a display screen, text, and other elements of the graphical user interface in the figures form no part of the claimed design. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-3. No ornamental aspects are associated with the process or period in which one image transitions to another image.
