(57) **CLAIM**

The ornamental design for an electronic device with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. **1** is a front elevation view of a first image in a sequence of a first embodiment of an electronic device with transitional graphical user interface showing our new design with the transitional graphical user interface displayed on an inner display screen of the electronic device in an open configuration;

FIG. **2** is a rear elevation view thereof;

FIG. **3** is a front elevation view of a second image in a sequence of the first embodiment of an electronic device with transitional graphical user interface showing our new design with the transitional graphical user interface displayed on an outer display screen of the electronic device in a folded configuration;

FIG. **4** is a rear elevation view thereof;

FIG. **5** is a front elevation view of a first image in a sequence of a second embodiment of an electronic device with transitional graphical user interface showing our new design with the transitional graphical user interface displayed on an inner display screen of the electronic device in an open configuration;

FIG. **6** is a rear elevation view thereof;

FIG. **7** is a front elevation view of a second image in a sequence of the second embodiment of an electronic device with transitional graphical user interface showing our new

design with the transitional graphical user interface displayed on an outer display screen of the electronic device in a folded configuration; and,

FIG. **8** is a rear elevation view thereof.

The evenly-dashed broken lines in the drawings illustrate portions of the electronic device with transitional graphical user interface that form no part of the claimed design.

The appearance of the transitional graphical user interface sequentially transitions between the images shown in FIGS. **1** and **3**, and FIGS. **5** and **7**, respectively. The process or period in which one image transitions to another forms no part of the claimed design.
