The ornamental design for a display screen, or portion thereof, with animated graphical user interface, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

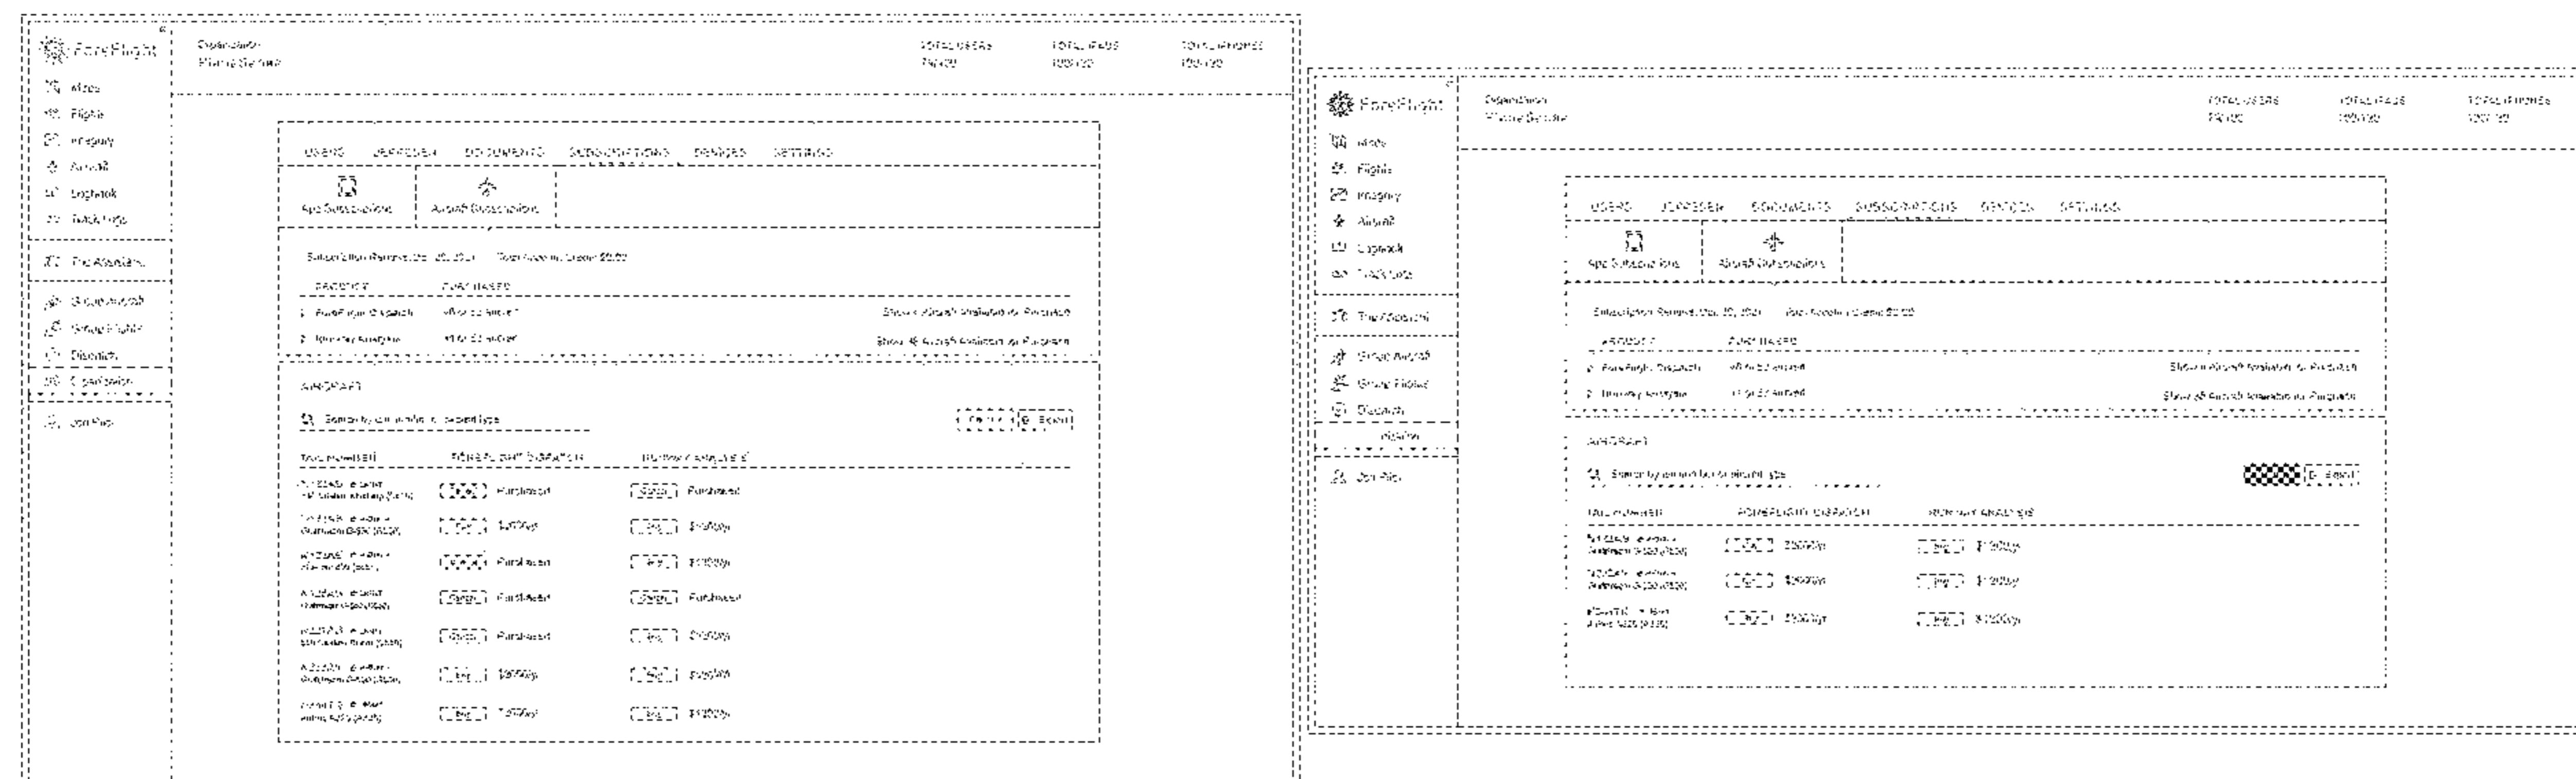

FIG. 1 is a front view of a display screen or portion thereof with animated graphical user interface, showing a first image of our new design;

FIG. 2 is a second image thereof;

FIG. 3 is a front view of a display screen or portion thereof with animated graphical user interface, showing a first image of another embodiment of our new design; and, FIG. 4 is a second image thereof.

The appearance of the animated image sequentially transitions between the images shown in FIGS. 1 through 2 and FIGS. 3 through 4, respectively. The process or period in which one image transitions to another image forms no part of the claimed design.

The outermost broken lines in the figures show a display screen or portion thereof, and form no part of the claimed design. The other broken lines in the figures show portions of the animated graphical user interface that form no part of the claimed design.
