(57) **CLAIM**

The ornamental design for an electronic device with graphical user interface having a three dimensional appearance, as shown and described.

**DESCRIPTION**

The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. **1** is a front view of a display screen or portion thereof with graphical user interface having a three-dimensional appearance showing the claimed design;

FIG. **2** is another front view thereof, showing the front orientation of the graphical user interface;

FIG. **3** is another front view thereof, showing the rear orientation of the graphical user interface;

FIG. **4** is another front view thereof, showing the right side orientation of the graphical user interface;

FIG. **5** is another front view thereof, showing the left side orientation of the graphical user interface;

FIG. **6** is another front view thereof, showing the top orientation of the graphical user interface;

FIG. **7** is another front view thereof, showing the bottom orientation of the graphical user interface;

FIG. **8** is another embodiment of a front view of a display screen or portion thereof with graphical user interface having a three-dimensional appearance;

FIG. **9** is another front view thereof, showing the front orientation of the graphical user interface;

(Continued)

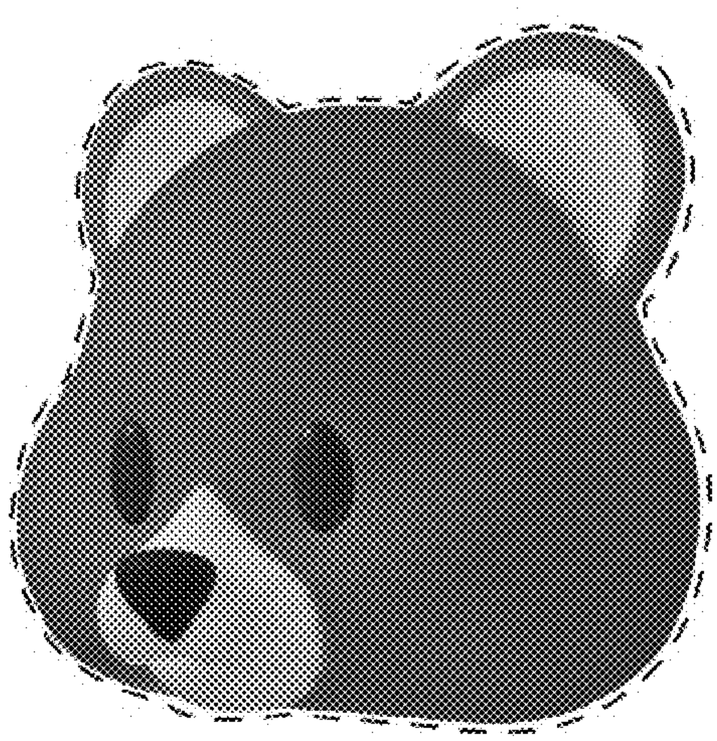

FIG. **10** is another front view thereof, showing the rear orientation of the graphical user interface;
FIG. **11** is another front view thereof, showing the right side orientation of the graphical user interface;
FIG. **12** is another front view thereof, showing the left side orientation of the graphical user interface;
FIG. **13** is another front view thereof, showing the top orientation of the graphical user interface;
FIG. **14** is another front view thereof, showing the bottom orientation of the graphical user interface; and,
FIG. **15** is front view of an electronic device having a display screen, with the graphical user interface of FIG. **1** applied to the display screen. The graphical user interface of FIGS. **2-14** may be similarly applied thereto.
The outermost broken lines in the figures show a display screen or portion thereof, or an electronic device having a display screen, and form no part of the claimed design. The other broken lines in FIG. **15** show portions of the graphical user interface that form no part of the claimed design.
The graphical user interface in FIGS. **1-15** is shown in various orientations to provide an understanding of the three-dimensional appearance of the design. The scope of the claim does not include any orientation or view that is not shown.

**1 Claim, 3 Drawing Sheets**
**(2 of 3 Drawing Sheet(s) Filed in Color)**

**Related U.S. Application Data**

continuation of application No. 29/634,159, filed on Jan. 18, 2018, now Pat. No. Des. 844,700.
