Filed Mar. 30, 1971, Ser. No. 129,647 Int. Cl. A01h 5/00

U.S. Cl. Plt.—75

1 Claim

The present invention comprises a new and distinct 10 cultivar of garden variety chrysanthemum plant which is a seedling of Snowbound×#723-69. Both parents are unpatented and the numbered parent is identified by such number for breeding purposes to distinguish such parent from others in the same breeding program.

The new cultivar is similar in certain respects to White Grandchild, having the same spreading habit and flowering period.

The new cultivar is distinguished from White Grand-

child by the following characteristics: (1) Flowers are 1/4" larger, more ivory in color and

do not tinge pink with age.

(2) 3" shorter habit.

(3) Lighter colored foliage.

(4) More deeply indented leaf with a coarser serra- 25 tion to the leaf margin.

(5) More prominent stipules.

(6) 6 days longer keeping quality under outdoor conditions.

(7) Flowers approximately 5 to 6 days later than White Grandchild in outdoor natural season flowerings.

(8) Flowers approximately 2 to 3 days later in no light/no shade spring pot programs for May flowerings.

The new cultivar was selected from the progeny of the designated cross and when asexually reproduced by cuttings at Barberton, Ohio, has been found to retain its distinctive characteristics through successive propagations.

The new cultivar when grown in the vicinity of Barberton, Ohio, has a response period of approximately 7 weeks, and a natural flowering date of October 1. The following detailed description is based on observations made of the new cultivar in both a greenhouse and outdoors in Barberton, Ohio. The response time, blooming period, color, and total vigor may vary significantly with varying environmental conditions such as temperature, day length, and light intensity. Suggested flowering in the northern and western United States and coastal California is from mid-April through May and mid-September through mid-20 October.

The accompanying drawing shows the unique characteristics of the new cultivar, the color being as nearly true as possible with color illustrations of this type.

In the following description, color references are made to the Munsell Color Book, 1963 edition, and where only one value or description is listed, such value or description applies also to the comparison cultivar. Comparisons are made with the cultivar White Grandchild.
