*Primary Examiner*—Wendy C. Haas(74) *Attorney, Agent, or Firm*—Foley & Lardner LLP(57) **ABSTRACT**

A new and distinct *Torenia* plant named ‘DANMOON20’ particularly characterized by plenty of delicate, funnel form, cup-shaped flowers with yellow petals and a purple throat; mounded bush, which maintains a compact, rounded plant habit; vigorous growth habit; densely branched plant, gracefully cascading from hanging baskets; early flowering response and stays in full bloom in moderate climate; suitable as an annual for hanging pots outdoors under particular shade; and good weather tolerance with a preferred temperature range of 15° C. to 25° C.

**2 Drawing Sheets****1**

Latin name of the genus and species of the plant claimed:  
*Torenia* sp.

Variety denomination: ‘DANMOON20’.

**BACKGROUND OF THE INVENTION**

The present invention relates to a new and distinct cultivar of *Torenia* plant, botanically known as *Torenia* sp. of the *Scrophulariaceae* family, and hereinafter referred to by the 10 cultivar name ‘DANMOON20’.

The new *Torenia* cultivar is a product of a controlled breeding program conducted by the inventor, Gabriel Danziger, in Moshav Mishmar Hashiva, Israel. The objective 15 of the breeding program was to develop a new *Torenia* cultivar with yellow flowers.

The new *Torenia* cultivar originated from an induced mutation of the *Torenia* cultivar designated ‘TR-3-1202’ (unpatented). The new *Torenia* cultivar was discovered and selected by the inventor, Gabriel Danziger, as a single flowering plant within the progeny of the stated mutation in a controlled environment in January of 2005 in Moshav Mishmar Hashiva, Israel. The induced mutation arose by irradiation. 20

Asexual reproduction of the new *Torenia* cultivar by soft tip cuttings was first performed in June of 2005 in Moshav Mishmar Hashiva, Israel, and has demonstrated that the combination of characteristics as herein disclosed for the new cultivar are firmly fixed and retained through successive generations of asexual reproduction. The new cultivar reproduces true to type. 25

**2****BRIEF DESCRIPTION OF THE INVENTION**

The following traits have been repeatedly observed and are determined to be basic characteristics of ‘DANMOON20’. Which in combination distinguish this *Torenia* as a new and distinct cultivar:

1. Plenty of delicate, funnel form, cup-shaped flowers with yellow petals and a purple throat.
2. Mounded bush, which maintains a compact, rounded plant habit.
3. Vigorous growth habit;
4. Densely branched plant, gracefully cascading from hanging baskets;
5. Early flowering response and stays in full bloom in moderate climate;
6. Suitable as an annual for hanging pots outdoors under partial shade; and
7. Good weather tolerance with a preferred temperature range of 15° C. to 25° C.

Plants of the new *Torenia* cultivar ‘DANMOON20’ differ from the parental cultivar, ‘TR-3-1202’ in the following characteristics described in Table 1.

TABLE 1

Characteristic	New Cultivar ‘DANMOON20’	Parental Cultivar ‘TR-3-1202’ (unpatented)
30 Mature Flower Color	Petal shades of yellow, RHS 5A, with a yellow blotch on lower petal,	Petal shades of violet, with a yellow blotch on lower petal

TABLE 1-continued

Characteristic	New Cultivar 'DANMOON20'	Parental Cultivar 'TR-3-1202' (unpatented)
Flower Size	RHS 6A Depth: About 3.2 cm Width: About 3.5 cm	Depth: About 3.0 cm Width: About 3.0 cm
Growth Habit	Cascading Bush	Cascading Bush
Flowering Response Time	3 weeks from planting	3 weeks from planting

Of the many commercial cultivars known to the inventor, the most similar in comparison to the new *Torenia* cultivar 'DANMOON20' is the *Torenia* cultivar 'ROSE MOON' (unpatented) in the following characteristics described in Table 2:

TABLE 2

Characteristic	New Cultivar 'DANMOON20'	Comparison Cultivar 'ROSE MOON' (unpatented)
Mature Flower Color	Petal shades of yellow, RHS 5A, with a yellow blotch on lower petal, RHS 6A	Petal shades of light red-purple, with a yellow blotch on lower petal
Flower Size	Depth: About 3.2 cm Width: About 3.5 cm	Depth: About 3.5 cm Width: About 3.8 cm
Growth Habit	Cascading Bush	Cascading Bush
Flowering Response Time	3 weeks from planting	7 weeks from planting

#### BRIEF DESCRIPTION OF THE PHOTOGRAPHS

The accompanying photographs illustrate the overall appearance of the new *Torenia* cultivar 'DANMOON20' showing the colors as true as is reasonably possible with colored reproductions of this type. Colors in the photographs may differ slightly from the color values cited in the detailed botanical description, which accurately describe the color of 'DANMOON20'.

FIG. 1 shows a side perspective view of a typical flowering plant of 'DANMOON20' in a hanging plant at 3 months of age.

FIG. 2 shows a close-up of the typical flowers, buds and leaves of 'DANMOON20' at 3 months of age.

#### DETAILED BOTANICAL DESCRIPTION

The new *Torenia* cultivar 'DANMOON20' has not been observed under all possible environmental conditions. The phenotype of the new cultivar may vary with variations in environment such as temperature, light intensity, and day length without any change in the genotype of the plant.

The aforementioned photographs, together with the following observations, measurements and values describe plants of 'DANMOON20' as grown in a greenhouse in Moshav Mishmar Hashiva, Israel, under conditions which closely approximate those generally used in commercial practice. Optimal growth conditions include that plants of 'DANMOON20' are grown outdoors in a moderate climate and indoors during the winter season. Irrigation and fertilization are recommended on a regular basis. Plants of 'DANMOON20' are usually grown in full sunlight, but partial shade is required in mid summer. Plants of 'DANMOON20' are fully-grown in 3 months from planting

a cutting in the summer season and bloom all year-round in a moderate climate. Plants of 'DANMOON20' described herein were grown indoors in 16 cm pots in a glass greenhouse in Moshav Mishmar Hashiva, Israel, with the day temperatures ranging from 18° C. to 35° C. and night temperatures ranging from 16° C. to 25° C. Plants of 'DANMOON20' were fertilized up to a level of 59 ppm N, 35.4 ppm P and 94.4 ppm K.

Color references are made to The Royal Horticultural Society Colour Chart (R.H.S.), 2001 edition, except where general colors of ordinary significance are used. Color values were taken under daylight conditions at approximately noon in Moshav Mishmar Hashiva, Israel. The age of the 'DANMOON20' plants described is 12 weeks.

**Parentage:** *Torenia* cultivar designated 'TR-3-1202' (unpatented).

**Propagation:** Tissue culture (axillary buds) and soft tip cuttings.

**Plant:**

*Form.*—Bush, cascading.

*Growth habit.*—Compact, rounded.

*Height.*—20–25 cm.

*Spread.*—About 50 cm.

*Cold tolerance.*—Frost tender. Temperatures below 8° C. may damage plants.

*Vigor.*—Vigorous growth; plants are fully-grown in 3 months from planting cuttings during summer season.

**Stem:**

*Color.*—RHS 146A, yellow-green.

*Length.*—About 25 cm.

*Diameter.*—About 3 mm.

*Pubescence.*—Minimal.

*Branching.*—About 15 to 25 main branches grow from the base and split into hundreds of secondary and tertiary branches.

*Length of internodes.*—1.0 to 8.0 cm.

**Foliation:**

*Overall shape.*—Deltoid.

*Apex.*—Acute.

*Base.*—Cordate.

*Size of leaf.*—Width: 2.0 to 4.0 cm. Length: About 3.5 cm.

*Margin.*—Serrate.

*Color.*—Center color of leaf: RHS 137A, green. Upper side: RHS 137A, green. Under side: RHS 146B, yellow-green.

*Leaf texture.*—Glabrous with sensible veins.

*Venation.*—Pattern: Anastomose. Color: Upper surface: RHS 137A, green. Lower surface: RHS 146B, yellow-green.

*Petioles.*—Length: About 0.5 cm to 1.5 cm. Diameter: About 2.5 mm. Color: RHS 143A, green.

**Flowers:**

*Blooming period.*—All year round in a moderate climate or in a greenhouse environment. In Israel, flowering occurs between February and November outdoors.

*Flowering response time.*—About 3 weeks from planting.

*Flowering stem.*—Flowers appear along the growing stems.

*Quantity of flowers.*—Per stem: About 4 to 7; Per plant: About 200 to 350.

*Flowering longevity.*—On the plant: About 2 to 5 days, depending on temperature.

*Type.*—Single.

*Shape.*—Overall: funnel form; 5-winged. Corolla tube: cylindrical or often broadened above; Corolla: 2-lipped, the upper lip faintly 2-lobed, the lower lip 3-lobed.

*Orientation at opening.*—Slanted upward.

*Fragrance.*—None.

*Flower size.*—Depth: About 3.2 cm. Width: About 3.5 cm.

*Bud.*—Shape: Oblong, cylindrical, ellipsoid, 5-winged.

*Size.*—Length: About 1.7 mm. Diameter: About 0.9 mm.

*Color.*—Apex: RHS 146A, yellow-green. Base: RHS 146A, yellow-green.

*Texture.*—Pubescence on winged edges.

*Floral tube.*—Length: About 3.0 cm. Width: About 0.2 cm to 1.1 cm. Color: Outside: RHS 70A, red-purple (upper side) and RHS 2A and RHS 2C, yellow (lower side). Inside: RHS 72A, red-purple (apex) and RHS 3C, yellow (base).

*Petals.*—Number: Four, fused. Length: Upper Petal: About 2.5 cm; Side Petals: About 2.0 cm; Lower Petal: About 2.0 cm. Width: Upper Petal: About 2.6 cm; Side Petals: About 1.2 cm; Lower Petal: About 1.8 cm. Shape: Upper Petal: Overall: spatulate, Apex: rounded, Base: fused; Side Petals: Overall: spatulate, Apex: rounded, Base: fused; Lower: Overall: spatulate, Apex: rounded, Base: fused. Margin: Undulated and toothed. Color: Mature Petals: Upper Surface: Upper Petal: Near apex, RHS 5A, yellow, and near base, RHS 70C, red-purple, and margin, RHS 5A, yellow; Side Petals: Near apex, RHS 5A, yellow, and near base, RHS 70C, red-purple, and margin RHS 5A, yellow; Lower Petal: Primarily RHS 5A, yellow, with RHS 6A, yellow blotch in the middle near base, and margin RHS 5A, yellow. Lower Surface: Upper Petal: Near apex, RHS 5A, yellow, and near base, RHS 70A, red-purple, and margin, RHS 5A, yellow; Side Petals: Near apex, RHS 5B, yellow, and near base, RHS 70B, red-purple, and margin, RHS 5A, yellow; Lower Petal: Near apex, RHS 3A, yellow, and near base and margin, RHS 3C, yellow. Throat: Upper throat: RHS 70B, red-purple; Lower throat: RHS 1C, green-

yellow. Immature Petals: Upper Surface: Upper Petal: Near apex, base and margin, RHS 6A, yellow; Side Petals: Near apex, base and margin, RHS 6A, yellow; Lower Petal: Primarily RHS 6A, yellow, including near base, with a yellow blotch RHS 7A, yellow, and margin, RHS 6A, yellow. Lower Surface: Upper Petal: Near apex, base and margin, RHS 5A, yellow; Side Petals: Near apex, base and margin, RHS 5A, yellow; Lower Petal: Near apex, RHS 64A, red-purple, near base, RHS 4B, yellow, and margin, RHS 4B, yellow. Throat: Center of Flower: RHS 70A, red-purple.

*Sepals.*—Number: 5. Length: About 1.7 cm. Width: About 0.3 cm. Shape: Two-lobed, 5-winged. Apex: Acute. Base: Wedge shaped. Margin: Undulated. Color: RHS 146A, yellow-green.

*Peduncle.*—Length: 1.0 to 2.4 cm. Diameter: About 2.5 mm. Color: RHS 146A, yellow-green.

*Reproductive organs:*

*Androecium.*—Stamen: Number: 2 pairs of flower, fused. Color: RHS N80A, purple-violet, and RHS N155C, white. Anther: Length: About 0.4 cm. upper anther shorter — about 0.3 cm. Width: About 0.1 cm (separate, usually there are two fused). Color: RHS N155C, white. Spur: Present. Filament: Length: About 1.2 cm; lower filaments are shorter about 0.5 cm. Width: About 0.4 mm. Color: RHS N80A, purple-violet. Pollen: Amount: Sparse. Color: RHS N155A, white. Requirements for pollination: Young flowers, vital pollen, and receptive, open stigma.

*Gynoecium.*—Pistil: Number: One per flower. Length: About 2.6 cm. Stigma: Length: About 0.2 cm. Width: About 0.2 cm. Color: RHS 76A, purple. Style: Length: About 2.2 cm. Color: RHS 75A, purple. Ovary: Number: 1. Length: About 0.4 cm. Width: About 0.2 cm. Color: RHS 144A, yellow-green.

*Seed/fruit:* None.

*Pest/disease resistance and/or susceptibility:* A standard preventative spray program is sufficient as no susceptibility was observed.

*Temperature tolerance:* Sensitive to temperatures below 5° C.

I claim:

1. A new and distinct *Torenia* plant named 'DANMOON20', as illustrated and described herein.
