(57) **ABSTRACT**

A new and distinct *Verbena* plant named 'Gruelox 02' having  
plentiful and large flowers with a small purple eye in the  
middle.

**1 Drawing Sheet**

**1**

Botanical classification: *Verbena hybrida*.  
Varietal denomination: 'Gruelox 02'.

**BACKGROUND OF THE INVENTION**

The present invention comprises a new and distinct cultivar  
of *Verbena* plant known by the varietal name 'Gruelox 02'.  
The new variety was discovered in August of 2003 in a  
selected breeding program in Waltrip, Germany. The purpose  
of the breeding program was to produce a new variety of  
*Verbena* with large flowers and improved mildew resistance.  
The new variety was selected from a cross of proprietary  
unpatented breeding plants identified as 5-11-1 (female par-  
ent, unpatented) and 4-3 (male parent, unpatented). The new  
variety exhibits a bushy, compact growth habit that is similar  
to its parents, but exhibits more and larger flowers than both  
parents and also exhibits hard and glossy leaves. Further,  
'Gruelox 02' has larger flowers (20 mm vs. 8-10 mm) than  
*Verbena* plant 'Sumverdi'. The new variety was first asexu-  
ally reproduced in October 2003 by tipcuttings in Waltrip,  
Germany. The new variety has been trial and field tested and  
has been found to retain its distinctive characteristics and  
remain true to type through successive asexual propagations.

The following traits also distinguish 'Gruelox 02' as a new  
and distinct cultivar from other *Verbena* varieties known to  
the breeder:

1. 'Gruelox 02' exhibits a small, purple eye;
2. 'Gruelox 02' has plentiful flowers per spike; and
3. 'Gruelox 02' has large flowers.

**DESCRIPTION OF THE DRAWINGS**

The accompanying photographic drawing illustrates the  
new variety, with the color being as nearly true as is possible  
with color illustrations of this type:

FIG. 1 is a photograph of the plant.

**2**

**DESCRIPTION OF THE PLANT**

The following detailed description sets forth characteris-  
tics of the new cultivar. The data which defines these charac-  
teristics were collected by asexual reproductions by cuttings  
carried out in Waltrip, Germany. Plants for the description  
were 11 weeks old, grown in a greenhouse during the Summer  
in 10.5 cm containers. The color readings were taken in an  
office under artificial light. Color references are primarily to  
The 2001 R.H.S. Colour Chart of The Royal Horticultural  
Society of London.

**PLANT**

Height (from soil to top of flowers): Approximately 20 cm.  
Diameter: Approximately 20 cm.  
Vigor: Compact.

Roots:

*Habit*.—Spreading.

*Time to initiate roots*.—About 10 days at 18° C.

*Time to develop roots*.—About 21 days at 18° C.

Time to finish a flowered plant: About 10-12 weeks in a 10.5  
cm container.

Branching habit: Bushy.

Lateral branches:

*Color*.—146B.

*Texture*.—Smooth.

*Diameter*.—Approximately 3-4 mm.

*Internode length*.—Approximately 20-25 mm.

Foliage:

*Arrangement*.—Opposite.

*Size of leaf*.—Length: 25-30 mm. Width: Approximately  
18-20 mm.

*Shape of leaf*.—Lanceolate.

*Shape of apex*.—Acute.

*Shape of base*.—Obtuse.

*Texture*.—Smooth.

*Margin*.—Crenate.

*Color*.—Young leaves: Upper surface: 137A. Lower surface: 137D. Mature leaves: Upper surface: 137A. Lower surface: 137B.  
*Petiole*.—Length: 5 mm. Diameter: 1 mm. Color: 138B.  
*Veins*.—Venation type: Pinnate. Color: Upper surface: 138B. Lower surface: 138B.

## FLOWER

Natural flowering season: From April until October.

Bud (described before opening):

*Shape*.—Long; 5 parted.

*Diameter*.—3 mm.

*Length*.—10-11 mm.

*Color*.—N57C.

Spike:

*Number of flowers per spike*.—Approximately 35-45.

*Diameter*.—Approximately 15-18 mm.

*Length*.—Approximately 8-10 cm after flowering.

*Color*.—68A.

Inflorescence:

*Type*.—Round umbel.

*Length*.—35-40 mm.

*Diameter*.—50-58 mm.

*Number of flowers per inflorescence*.—Fully opened: 9-10. Half opened: 2-3. Buds: 2-3.

Pedicle:

*Umbel length*.—35-45 mm.

*Diameter*.—1.8 mm.

*Color*.—Almost 137C.

Corolla:

*Form*.—Fused petals.

*Petals/lobes*.—Number: 5. Length: Approximately 7-9 mm. Width: Approximately 6-7 mm. Shape: Obovate. Aspect: Flat. Margin: Lobated. Apex: Heart-shaped. Texture and appearance: Smooth. Color: When opening: Upper surface: N57 with a 71B eye. Lower sur-

face: N57. Fully opened: Upper surface: N57 with a 71B eye. Lower surface: N57.

*Throat*.—Color: 130D. Texture: Smooth.

*Tube color*.—130D.

*Tube length*.—21 mm.

Calyx:

*Form*.—Fused at base; cylindrical.

*Length*.—Approximately 8-11 mm.

*Diameter*.—2 mm.

*Sepal*.—Shape: Cylindrical; 5 connected sepals. Margin: Acuminate. Texture: Smooth. Color: Upper surface: 137B. Lower surface: 137B to 137D.

Disease resistance: No resistance or susceptibility to pests or diseases noted to date.

15 Fragrance: None.

Temperature tolerance: From 1° C. to 45° C.

Lasting quality: Good.

## REPRODUCTIVE ORGANS

20 Stamens:

*Number*.—4.

*Filament length*.—0.5 mm.

*Anthers*.—Shape: Oval. Length: 0.01 mm. Color: N144D.

*Pollen*.—Color: 154C. Amount: Minimal.

Pistil:

*Length*.—10-12 mm.

*Style*.—Length: Less than 0.5 mm. Color: 137B to 137D.

30 *Stigma*.—Shape: Oval. Color: 137D.

Seed production: None.

I claim:

1. A new and distinct variety of *Verbena* plant named 'Gruelox 02' substantially as shown and described herein.
