(57) **ABSTRACT**

A new *Petunia plant* named ‘PEHY0029’ particularly dis-  
tinguished by medium sized, rose flowers, early flowering  
and a semi-trailing to mounding plant habit.

**1 Drawing Sheet**

**1**

Latin name of the genus and species of the plant claimed:  
*Petunia hybrida*.  
Varietal denomination: ‘PEHY0029’.

**BACKGROUND OF THE NEW PLANT**

The present invention comprises a new *Petunia*, botani-  
cally known as *Petunia hybrida*, and hereinafter referred to  
by the variety name ‘PEHY0029’.

‘PEHY0029’ is a product of a planned breeding program.  
The new cultivar has medium sized, rose flowers, early  
flowering and a semi-trailing to mounding plant habit.

‘PEHY0029’ originated from a hybridization made in  
October 2011 in a controlled breeding environment in  
Enkhuizen, The Netherlands. The female parent was the  
commercial variety *petunia* ‘SANGUNA Purple Improved’  
(Not protected in US) with purple flower color and a  
comparable plant habit with some more vigor.

The male parent of ‘PEHY0029’ was the unpatented line  
‘H9189-2’, a plant with comparable plant habit and a salmon  
colored flower and late flowering.

The resulting seeds were sown in January 2012.  
‘PEHY0029’ was selected as one flowering plant within the  
progeny of the stated cross in May 2012 in a controlled  
environment in Enkhuizen, The Netherlands.

The first act of asexual reproduction of ‘PEHY0029’ was  
accomplished when vegetative stem tip cuttings were propa-

gated from the initial selection in June 2012 in a controlled  
environment in Angers, France.

**BRIEF SUMMARY OF INVENTION**

Horticultural examination of plants grown from cuttings  
of the plant initiated in June 2012 and continuing thereafter,  
has demonstrated that the combination of characteristics as  
herein disclosed for ‘PEHY0029’ are firmly fixed and are  
retained through successive generations of asexual repro-  
duction.

‘PEHY0029’ has not been observed under all possible  
environmental conditions. The phenotype may vary signifi-  
cantly with variations in environment such as temperature,  
light intensity, and day length.

A Plant Breeder’s Right for this cultivar was applied for  
in the European Union on Oct. 31, 2016, No. 2016/2638.  
‘PEHY0029’ has not been made publicly available prior to  
the effective filing date of this application, notwithstanding  
any disclosure that may have been made less than one year  
prior to the effective filing date of this application by the  
inventor or another who obtained ‘PEHY0029’ directly from  
the inventor.

The following traits have been repeatedly observed and  
are determined to be basic characteristics of the new variety.  
The combination of these characteristics distinguishes this  
*Petunia* as a new and distinct variety.

## BRIEF DESCRIPTION OF THE PHOTOGRAPHS

The accompanying photographic drawing shows typical flower and foliage characteristics of 'PEHY0029' with colors being as true as possible with an illustration of this type.

The photographic drawing shows in FIG. 1. a flowering plant of the new variety and in FIG. 2. a close-up of the flowers.

## DETAILED BOTANICAL DESCRIPTION

The aforementioned photographs were taken in September 2016 from plants growing outside in Andijk, The Netherlands. These plants were approximately 22 weeks of age.

The plant descriptions and measurements were taken in October 2016 in Enkhuizen, Netherlands on 23 week old plants that were growing in 25 cm pots.

Color references are made to The Royal Horticultural Society Colour Chart (R.H.S.) 2001.
