Primary Examiner — June Hwu(74) *Attorney, Agent, or Firm* — Dale Skalla(57) **ABSTRACT**A new *Chrysanthemum* plant named 'CIDZ0110' having

pact strong and uniform plant habit, and a flowering
response time of 7 weeks.**1 Drawing Sheet****1**

Latin name of the genus and species of the plant claimed:
Chrysanthemum x morifolium.
Varietal denomination: 'CIDZ0110'.

BACKGROUND OF THE NEW PLANT

The present invention comprises a new *Chrysanthemum*,
botanically known as *Chrysanthemum x morifolium*, and
hereinafter referred to by the variety name 'CIDZ0110'.

'CIDZ0110' is a product of a planned breeding program.
The new cultivar has large sized orange bronze daisy-type
inflorescences, compact strong and uniform plant habit, and
a flowering response time of 7 weeks.

'CIDZ0110' originated from a hybridization made in
August 2013 in a greenhouse in Gilroy, Calif. The female
parent was the unpatented, proprietary plant designated as
'B7017', having light purple daisy-type inflorescences,
slightly smaller flower size and more vigorous growth when
compared to 'CIDZ0110'.

The male parent of 'CIDZ0110' was the unpatented,
proprietary plant designated as 'B8680', having orange
bronze daisy-type inflorescences, abundant pollen produc-
tion, smaller flower size and slower flowering response
when compared to 'CIDZ0110'.

The seed was sown in September 2014 and the resulting
plants were grown in pots in a greenhouse in Gilroy, Calif.
'CIDZ0110' was selected as one flowering plant within the
progeny of the stated cross in January 2015.

The first act of asexual reproduction of 'CIDZ0110' was
accomplished when vegetative cuttings were propagated
from the initial selection in April 2015 in Gilroy, Calif.

BRIEF SUMMARY OF INVENTION

Horticultural examination of plants grown from cuttings
of the plant initiated in April 2015 and continuing thereafter,

2

has demonstrated that the combination of characteristics as
herein disclosed for 'CIDZ0110' are firmly fixed and are
retained through successive generations of asexual repro-
duction.

5 'CIDZ0110' has not been observed under all possible
environmental conditions. The phenotype may vary signifi-
cantly with variations in environment such as temperature,
light intensity and day length.

10 A Plant Breeder's Right for this cultivar was applied for
in Canada on Aug. 4, 2021, No. 21 -10679. 'CIDZ0110' has
not been made publicly available prior to the effective filing
date of this application, notwithstanding any disclosure that
may have been made less than one year prior to the effective
filing date of this application by the inventor or another who
15 obtained 'CIDZ0110' directly from the inventor.

The following traits have been repeatedly observed and
are determined to be basic characteristics of the new variety.
The combination of these characteristics distinguishes this
20 *Chrysanthemum* as a new and distinct variety.

BRIEF DESCRIPTION OF THE PHOTOGRAPHS

25 The accompanying photographic drawings show typical
flower and foliage characteristics of 'CIDZ0110' with colors
being as true as possible with an illustration of this type.

The photographic drawings show in FIG. 1 a close-up
view of an inflorescence, and in
FIG. 2 a flowering plant of the new variety.

DETAILED BOTANICAL DESCRIPTION

30 The plant descriptions and measurements were taken
indoors in Hollister, Calif. in May 2021 on about 9 week old

plants. Unrooted cuttings had been planted, 4 plants per pot, in 6-inch pots on Mar. 3, 2021. The plants were pinched and moved to short days on Mar. 24, 2021 to induce flowering.

The aforementioned photographs: FIGS. 1 and 2 were taken of the same plants used for the descriptions and measurements in Hollister, Calif. in May 2021.

Color references are made to The Royal Horticultural Society Colour Chart (RHS) 2001.
