The broken lines depict portions of the input device in which the design is embodied that form no part of the claimed design. *The broken lines are generally intended to disclaim only said lines, seams, or other surface features, and not any area contained within or adjacent to said broken lines, unless the broken line represents a disclaimed button, the scroll wheel, or a portion of the bottom surface of the input device. For context, there is a top button behind the scroll wheel and two left-side side buttons configured above the ribbing—in embodiments where the scroll wheel, one or more of said buttons, or the bottom surface is represented by broken lines, the entire area defining said button, scroll wheel, and/or bottom surface is intended to be disclaimed, as implied by the lack of shading within the disclaimed portion of those features.*
